⁽²⁾ Performance information shown includes the reinvestment of dividend and capital gain distributions, but does not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

⁽³⁾ The S&P 500 TR Index is an unmanaged index of 500 common stocks that is generally considered representative of the U.S. stock market. It tracks both the capital gains of a group of stocks over time and assumes that any cash distributions, such as dividends, are reinvested back into the index. It is not possible to invest directly in an index.

⁽⁴⁾ The Morningstar Large Blend Category, as defined by Morningstar, Large-blend portfolios are fairly representative of the overall U.S. stock market in size, growth rates and price. Stocks in the top 70% of the capitalization of the U.S. equity market are defined as large cap. The blend style is assigned to portfolios where neither growth nor value characteristics predominate. These portfolios tend to invest across the spectrum of U.S. industries, and owing to their broad exposure, the portfolios' returns are often similar to those of the S&P 500 Index. It is not possible to invest in an index.

The Mairs & Power Growth Fund seeks to provide shareholders with a diversified portfolio of common stocks, which have the potential for above-average, long-term appreciation.

As of 9/30/2018, Morningstar Trailing Total Returns Rank in the Large Blend Category was 54 for one-year, 46 for three-year, 76 for five-year, 49 for ten-year among 1,316, 1,235, 1,165 and 1,033 large blend funds respectively.

As of 9/30/2018, Morningstar Rating of 3 stars Overall and 3 stars, 2 stars and 3 stars, for the 3-, 5- and 10-year periods among 1196, 1196, 1058 and 794 large blend funds, respectively, based on Morningstar Risk-Adjusted Return. The Morningstar Rating for funds, or star rating, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure

that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are 100% three-year rating for 36-59 months of total returns, 60% five-year rating, 40% three-year rating for 60-119 months of total returns, and 50% 10-year rating, 30% five-year rating, 20% three-year rating for 120 or more months of total returns. While the 10-year overall rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.
