

Mairs & Power Minnesota Municipal Bond ETF **(MINN)**

Listed on: Cboe BZX Exchange, Inc.

Statement of Additional Information

March 3, 2021

This Statement of Additional Information (“SAI”) provides general information about the Mairs & Power Minnesota Municipal Bond ETF (the “Fund”), a series of Trust for Professional Managers (the “Trust”). This SAI is not a prospectus and should be read in conjunction with the Fund’s current prospectus dated March 3, 2021 (the “Prospectus”), as supplemented and amended from time to time, which is incorporated herein by reference. A copy of the Prospectus may be obtained without charge, by calling (855) 839-2800, by visiting www.mairsandpower.com, or writing to the Fund, c/o U.S. Bank Global Fund Services, P.O. Box 701, Milwaukee, Wisconsin 53201-0701.

The Trust

The Trust is a Delaware statutory trust organized on May 29, 2001, and is registered with the Securities and Exchange Commission (“SEC”) as an open-end management investment company. The Fund is one series formed by the Trust. The Fund is a non-diversified series and has its own investment objective and policies. Shares of other series of the Trust are offered in separate prospectuses and SAIs. The Trust may register additional series and offer shares of a new fund or share class under the Trust at any time.

The Trust is authorized to issue an unlimited number of interests (or shares). Interests in the Fund are represented by shares of beneficial interest (“Shares”) each with a par value of \$0.001. Each share of the Trust has equal voting rights and liquidation rights, and is voted in the aggregate and not by the series or class of shares except in matters where a separate vote is required by the Investment Company Act of 1940, as amended (the “1940 Act”), or when the matters affect only the interests of a particular series or class of shares. When matters are submitted to shareholders for a vote, each shareholder is entitled to one vote for each full share owned and fractional votes for fractional shares owned. Shares of each series or class generally vote together, except when required under federal securities laws to vote separately on matters that only affect a particular class. The Trust does not normally hold annual meetings of shareholders. The Trust’s Board of Trustees (the “Board” or the “Board of Trustees”) shall promptly call and give notice of a meeting of shareholders for the purpose of voting upon removal of any trustee when requested to do so in writing by shareholders holding 10% or more of the Trust’s outstanding shares.

The Fund offers and issues Shares at its net asset value (“NAV”) only in aggregations of a specified number of Shares (each, a “Creation Unit”). The Fund generally offers and issues Shares in exchange for a basket of securities (“Deposit Securities”) together with the deposit of a specified cash payment (“Cash Component”). The Trust reserves the right to permit or require the substitution of a “cash in lieu” amount (“Deposit Cash”) to be added to the Cash Component to replace any Deposit Security. Shares are listed on the Cboe BZX Exchange, Inc. (the “Exchange”) and trade on the Exchange at market prices that may differ from the Shares’ NAV. Shares are also redeemable only in Creation Unit aggregations, primarily for a basket of Deposit Securities together with a Cash Component. A Creation Unit of the Fund generally consists of 10,000 Shares, though this may change from time to time. As a practical matter, only institutions or large investors purchase or redeem Creation Units. Except when aggregated in Creation Units, Shares are not redeemable securities.

Each share of the Fund represents an equal proportionate interest in the assets and liabilities belonging to the Fund and is entitled to such distributions out of the income belonging to the Fund as are declared by the Board of Trustees. The Board of Trustees has the authority from time to time to divide or combine the shares of any series into a greater or lesser number of shares of that series so long as the proportionate beneficial interests in the assets belonging to that series and the rights of shares of any other series are in no way affected. Additionally, in case of any liquidation of a series, the shareholders of the series being liquidated are entitled to receive a distribution out of the assets, net of the liabilities, belonging to that series. Expenses attributable to any series or class are borne by that series or class. Any general expenses of the Trust not readily identifiable as belonging to a particular series or class are allocated by, or under the direction of, the Board of Trustees on the basis of relative net assets, the number of shareholders or another equitable method. No shareholder is liable to further calls or to assessment by the Trust without his or her express consent.

The assets of the Fund received for the issue or sale of its shares, and all income, earnings, profits and proceeds thereof, subject only to the rights of creditors, shall constitute the underlying assets of the Fund. In the event of the dissolution or liquidation of the Fund, the shareholders of the Fund are entitled to share pro rata in the net assets of the Fund available for distribution to shareholders.

Mairs & Power, Inc. (the “Adviser”) serves as the investment adviser to the Fund.

Investment Policies, Strategies and Associated Risks

Investment Objective

The investment objective of the Fund is to seek current income that is exempt from federal and Minnesota state income tax consistent with the preservation of capital.

There is no assurance that the Fund will achieve its investment objective. The following discussion supplements the description of the Fund's investment objective and principal investment strategies set forth in the Prospectus. Except for the fundamental investment restrictions listed below (see "Investment Restrictions - Fundamental Investment Restrictions" below), the Fund's investment strategies and policies are not fundamental and may be changed by the sole action of the Board of Trustees, without shareholder approval. The Fund's investment objective and strategies may be changed without the approval of the Fund's shareholders. While the Fund is permitted to hold securities and to engage in various strategies as described hereafter, it is not obligated to do so.

Whenever an investment policy or limitation states a maximum percentage of the Fund's assets that may be invested in any security or other asset, or sets forth a policy regarding quality standards, the standard or percentage limitation is determined immediately after and as a result of the Fund's acquisition or sale of the security or other asset. Accordingly, except with respect to borrowing and illiquid securities, any subsequent changes in values, net assets or other circumstances are not considered when determining whether an investment complies with the Fund's investment policies and limitations. In addition, if a bankruptcy or other extraordinary event occurs concerning a particular investment by the Fund, the Fund may receive securities, real estate or other investments that the Fund would not, or could not, buy. If this happens, the Fund will sell these investments as soon as reasonably practicable while trying to maximize the return to Fund shareholders.

Diversification

The Fund is non-diversified. A fund is considered "non-diversified" when a relatively high percentage of its assets may be invested in the securities of a limited number of issuers. Under applicable federal laws, the diversification of a fund's holdings is measured at the time the fund purchases a security. However, if the Fund purchases a security and holds it for a period of time, the security may become a larger percentage of the Fund's total assets due to movements in the financial markets. If the market affects several securities held by the Fund, the Fund may have a greater percentage of its assets invested in securities of fewer issuers. Because the Fund is non-diversified, the Fund is subject to the risk that its performance may be hurt disproportionately by the poor performance of relatively few securities.

Although the Fund is non-diversified for purposes of the 1940 Act, the Fund intends to maintain the required level of diversification and otherwise conduct its operations so as to qualify as a regulated investment company ("RIC") for purposes of the Internal Revenue Code of 1986, as amended (the "Code"), and to relieve the Fund of any liability for federal income tax to the extent that its earnings are distributed to shareholders. Compliance with the diversification requirements of the Code may limit the investment flexibility of the Fund and may make it less likely that the Fund will meet its investment objective. See "Federal Income Tax Matters" in this SAI for further discussion.

General Market Risks

Global economies and financial markets are increasingly interconnected, which increases the probabilities that conditions in one country or region might adversely impact issues in a different country or region. In some cases, the stock prices of individual companies have been negatively impacted even though there may be little or no apparent degradation in the financial condition or prospects of that company. As a result of this volatility, many of the risks associated with an investment in the Fund may be increased. Continuing market problems may have adverse effects on the Fund.

LIBOR Transition Risk

The Fund may invest in securities that use LIBOR as a benchmark or reference rate for interest rate calculations. Plans are underway to phase out the use of LIBOR by the end of 2021. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Fund's transactions and the financial markets generally. As such, the potential effect of a transition away from LIBOR on the Fund cannot yet be determined. The expected discontinuation of LIBOR could have a significant impact on the financial markets and may present risks for certain market participants.

Cyber Security

With the increasing use of the Internet and technology in connection with the Fund's operations, the Fund is susceptible to greater operational and information security risks through breaches in cyber security. Cyber security breaches include, without limitation, infection by computer viruses and unauthorized access to the Fund's systems through "hacking" or other means for the purpose of misappropriating assets or sensitive information, corrupting data, or causing operations to be disrupted. Cyber security breaches may also occur in a manner that does not require gaining unauthorized access, such as denial-of-service attacks or situations where authorized individuals intentionally or unintentionally release confidential information stored on the Fund's systems. A cyber security breach may cause disruptions and impact the Fund's business operations, which could potentially result in financial losses, inability to determine the Fund's NAV, violation of applicable law, regulatory penalties and/or fines, compliance and other costs. The Fund and its shareholders could be negatively impacted as a result. In addition, because the Fund works closely with third-party service providers (*e.g.*, custodians), indirect cyber security breaches at such third-party service providers may subject Fund shareholders to the same risks associated with direct cyber security breaches. Further, indirect cyber security breaches at an issuer of securities in which the Fund invests may similarly negatively impact Fund shareholders because of a decrease in the value of these securities. While the Fund has established risk management systems designed to reduce the risks associated with cyber security breaches, there can be no assurances that such measures will be successful particularly since the Fund does not control the cyber security systems of issuers or third-party service providers.

Borrowing

The Fund may borrow money to the extent permitted under the 1940 Act, or otherwise limited herein, as such may be interpreted or modified by regulatory authorities having jurisdiction, from time to time. This borrowing may be unsecured. The 1940 Act precludes the Fund from borrowing if, as a result of such borrowing, the total amount of all money borrowed by the Fund exceeds 33 1/3% of the value of its total assets (that is, total assets including borrowings, less liabilities exclusive of borrowings) at the time of such borrowings. This means that the 1940 Act requires the Fund to maintain continuous asset coverage of 300% of the amount borrowed. If the 300% asset coverage should decline as a result of market fluctuations or other reasons, the Fund may be required to sell some of its portfolio holdings within three days to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to sell securities at that time, and could cause the Fund to be unable to meet certain requirements for qualification as a RIC under the Code.

Borrowing tends to exaggerate the effect on the Fund's NAV per share of any changes in the market value of the Fund's portfolio securities. Money borrowed will be subject to interest costs, which may or may not be recovered by earnings on the securities purchased. The Fund also may be required to maintain minimum average balances in connection with a borrowing or to pay a commitment or other fee to maintain a line of credit. Either of these requirements would increase the cost of borrowing over the stated interest rate.

The SEC takes the position that other transactions that have a leveraging effect on the capital structure of the Fund or are economically equivalent to borrowing can be viewed as constituting a form of borrowing by the Fund for purposes of the 1940 Act. These transactions can include entering into reverse repurchase agreements,

engaging in mortgage dollar roll transactions, selling securities short (other than short sales “against the box”), buying and selling certain derivatives (such as futures contracts), selling (or writing) put and call options, engaging in sale-buybacks, entering into firm-commitment and standby-commitment agreements, engaging in when-issued, delayed-delivery, to-be-announced securities, or forward-commitment transactions, and other trading practices that have a leveraging effect on the capital structure of the Fund or are economically equivalent to borrowing. A borrowing transaction will not be considered to constitute the issuance of a “senior security” by the Fund, and therefore such transaction will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by the Fund, if the Fund (1) maintains an offsetting financial position, (2) maintains liquid assets equal (as determined on a daily marked-to-market basis) in value to the Fund’s potential economic exposure under the borrowing transaction, or (3) otherwise “covers” the transaction in accordance with applicable SEC guidance (collectively, “covers” the transaction). Liquid assets are maintained to cover “senior securities transactions.” The value of the Fund’s “senior securities” holdings are marked-to-market daily to ensure proper coverage. The Fund may have to buy or sell a security at a disadvantageous time or price in order to cover a borrowing transaction. In addition, assets being maintained to cover “senior securities” transactions may not be available to satisfy redemptions or for other purposes.

Debt Securities

Debt securities may have fixed, variable or floating (including inverse floating) rates of interest. To the extent that the Fund invests in debt securities, it will be subject to certain risks. The value of the debt securities held by the Fund, and thus the NAV of the shares of the Fund, generally will fluctuate depending on a number of factors, including, among others, changes in the perceived creditworthiness of the issuers of those securities, movements in interest rates, the maturity of the Fund’s investments, changes in relative values of the currencies in which the Fund’s investments are denominated relative to the U.S. dollar, and the extent to which the Fund hedges its interest rate, credit and currency exchange rate risks. Generally, a rise in interest rates will reduce the value of fixed-income securities held by the Fund, and a decline in interest rates will increase the value of fixed-income securities held by the Fund. Longer term debt securities generally pay higher interest rates than do shorter term debt securities but also may experience greater price volatility as interest rates change.

The Fund’s investments in U.S. dollar- or foreign currency-denominated corporate debt securities of domestic or foreign issuers are limited to corporate debt securities (corporate bonds, debentures, notes and other similar corporate debt instruments) which meet the credit quality and other criteria set forth for the Fund. The rate of return or return of principal on some debt obligations may be linked to indices or stock prices or indexed to the level of exchange rates between the U.S. dollar and foreign currency or currencies. Differing yields on corporate fixed-income securities of the same maturity are a function of several factors, including the relative financial strength of the issuers. Higher yields are generally available from securities in the lower rating categories.

Since shares of the Fund represent an investment in securities with fluctuating market prices, the value of shares of the Fund will vary as the aggregate value of the Fund’s portfolio securities increases or decreases. Moreover, the value of lower-rated debt securities that the Fund purchases may fluctuate more than the value of higher-rated debt securities. Lower-rated debt securities generally carry greater risk that the issuer will default on the payment of interest and principal. Lower-rated fixed-income securities generally tend to reflect short term corporate and market developments to a greater extent than higher-rated securities that react primarily to fluctuations in the general level of interest rates. Changes in the value of securities subsequent to their acquisition will not affect cash income or yields to maturity to the Fund but will be reflected in the NAV of the Fund’s shares.

Corporate debt securities may bear fixed, contingent, or variable rates of interest and may involve equity features, such as conversion or exchange rights or warrants for the acquisition of stock of the same or a different issuer, participations based on revenues, sales or profits, or the purchase of common stock in a unit transaction (where corporate debt securities and common stock are offered as a unit).

When and if available, debt securities may be purchased at a discount from face value. From time to time, the Fund may purchase securities not paying interest or dividends at the time acquired if, in the opinion of the Adviser, such securities have the potential for future income (or capital appreciation, if any).

Investment grade securities are generally securities rated at the time of purchase Baa3 or better by Moody's or BBB- or better by S&P or comparable non-rated securities. Non-rated securities will be considered for investment by the Fund when the Adviser believes that the financial condition of the issuers of such obligations and the protection afforded by the terms of the obligations themselves limit the risk to the Fund to a degree comparable to that of rated securities which are consistent with the Fund's objective and policies.

Corporate debt securities with a below investment grade rating have speculative characteristics, and changes in economic conditions or individual corporate developments are more likely to lead to a weakened capacity to make principal and interest payments than in the case of high grade bonds. If a credit rating agency changes the rating of a portfolio security held by the Fund, the Fund may retain the portfolio security if the Adviser, where applicable, deems it in the best interest of the Fund's shareholders.

The ratings of fixed-income securities by a nationally recognized statistical rating organization are a generally accepted barometer of credit risk. They are, however, subject to certain limitations from an investor's standpoint. The rating of an issuer is heavily weighted by past developments and does not necessarily reflect future conditions. There is frequently a lag between the time a rating is assigned and the time it is updated. In addition, there may be varying degrees of difference in credit risk of securities in each rating category. The Adviser will attempt to reduce the overall portfolio credit risk through diversification and selection of portfolio securities based on considerations mentioned above.

Exchange-Traded Funds

The Fund may invest in shares of other exchange-traded funds ("ETFs"). ETFs are investment companies that trade like stocks. (See also "Investment Companies.") Like stocks, shares of ETFs are not traded at NAV, but may trade at prices above or below the value of their underlying portfolios. The price of an ETF is derived from and based upon the securities held by the ETF. Accordingly, the level of risk involved in the purchase or sale of an ETF is similar to the risk involved in the purchase or sale of a traditional common stock, except that the pricing mechanism for an ETF is based on a basket of stocks. Thus, the risks of owning an ETF generally reflect the risks of owning the underlying securities it is designed to track, although lack of liquidity in an ETF could result in its being more volatile than the underlying portfolio of securities. Disruptions in the markets for the securities underlying ETFs purchased or sold by the Fund could result in losses on the Fund's investment in ETFs. ETFs also have management fees that increase their costs versus the costs of owning the underlying securities directly. A portfolio manager may from time to time invest in ETFs, primarily as a means of gaining exposure for the Fund to the equity market without investing in individual common stocks, particularly in the context of managing cash flows into the Fund or where access to a local market is restricted or not cost-effective. The Fund may invest in certain ETFs that have obtained exemptive orders from the SEC that permit registered investment companies such as the Fund to invest in those ETFs beyond the limits of Section 12(d)(1) of the 1940 Act, subject to certain terms and conditions. Ordinarily, the 1940 Act limits the Fund's investments in a single ETF to 5% of its total assets and in all ETFs to 10% of its total assets. In reliance on such exemptive orders, the Fund may generally invest in excess of these 5% and 10% limitations in a single ETF or in multiple ETFs, respectively. For additional information, see "Investment Companies" below.

The Fund may invest its net assets in ETFs that invest in securities similar to those in which the Fund may invest directly, and count such holdings towards various guideline tests.

The Fund may invest in ETFs to gain broad market, sector or asset class exposure, including during periods when it has large amounts of uninvested cash or when the Adviser believes share prices of ETFs offer attractive values, subject to any applicable investment restrictions in the Prospectus and this SAI.

ETFs generally do not sell or redeem their shares for cash, and most investors do not purchase or redeem shares directly from an ETF at all. Instead, the ETF issues and redeems its shares in large blocks (typically 50,000 of its shares) called “creation units.” Creation units are issued to anyone who deposits a specified portfolio of the ETF’s underlying securities, as well as a cash payment generally equal to accumulated dividends on the securities (net of expenses) up to the time of deposit. Creation units are redeemed in kind for a portfolio of the underlying securities (based on the ETF’s NAV) together with a cash payment generally equal to accumulated dividends on the date of redemption. Most ETF investors purchase and sell ETF shares in the secondary trading market on a securities exchange in lots of any size, at any time during the trading day. ETF investors generally pay a brokerage fee for each purchase or sale of ETF shares, including purchases made to reinvest dividends.

Because ETF shares are created from the securities of an underlying portfolio and may be redeemed for the securities of an underlying portfolio on any day, arbitrage traders may move to profit from any price discrepancies between the shares and the ETF’s portfolio, which in turn helps to close the price gap between the two. Because of supply and demand and other market factors, there may be times during which an ETF share trades at a premium or discount to its NAV.

The Fund intends to be a long-term investor in ETFs and does not intend to purchase and redeem creation units to take advantage of short-term arbitrage opportunities. However, the Fund may redeem creation units for the underlying securities (and any applicable cash) and may assemble a portfolio of the underlying securities to be used (with any required cash) to purchase creation units, if the Adviser believes that it is in the Fund’s best interest to do so. The Fund’s ability to redeem creation units may be limited by the 1940 Act, which provides that ETFs are not obligated to redeem shares held by the Fund in an amount exceeding 1% of their total outstanding securities during any period of less than 30 days.

The Fund will invest in ETF shares only if the ETF is registered as an investment company under the 1940 Act (see “Investment Companies” below). If an ETF in which the Fund invests ceases to be a registered investment company, the Fund will dispose of the securities of the ETF. Furthermore, in connection with its investment in ETF shares, the Fund incurs various costs. The Fund may also realize capital gains or losses when ETF shares are sold, and the purchase and sale of the ETF shares may generate a brokerage commission that may result in costs. In addition, the Fund will be subject to other fees as an investor in ETFs. Generally, those fees include, but are not limited to, trustee fees, operating expenses, licensing fees, registration fees and marketing expenses, each of which will be reflected in the NAV of the ETF and therefore its shares.

There is a risk that an ETF in which the Fund invests may terminate due to extraordinary events that may cause service providers to the ETF, such as the trustee or sponsor, to close or otherwise fail to perform their obligations to the ETF. Also, because the ETFs in which the Fund may principally invest are granted licenses to use the relevant indices as a basis for determining their compositions and otherwise to use certain trade names, the ETFs may terminate if the license agreements are terminated. In addition, an ETF may terminate if its NAV falls below a certain amount.

Illiquid Securities

The Fund may invest in illiquid securities if such purchases at the time thereof would not cause more than 15% of the value of the Fund’s net assets to be invested in such illiquid or not readily marketable assets.

The term “illiquid security” is defined as a security which the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the security. The lack of an established secondary market may make it more difficult to value illiquid securities, requiring the Fund to rely on judgments that may be somewhat subjective in determining value, which could vary from the amount that the Fund could realize upon disposition. Difficulty in selling illiquid securities may result in a loss or may be costly to the Fund. Under the supervision of the Board, the Adviser determines the liquidity of the Fund’s investments subject to guidelines as set forth in the Fund’s liquidity risk management program. Illiquid securities will generally be valued in such manner as the Board in good faith deems appropriate to reflect their fair market value.

Investment Companies

The Fund may invest in securities of other investment companies, including closed-end investment companies, ETFs and business development companies, subject to limitations prescribed by the 1940 Act and any applicable investment restrictions described in the Fund’s Prospectus and SAI. Among other things, the 1940 Act limitations prohibit the Fund from: (1) acquiring more than 3% of the voting shares of an investment company; (2) investing more than 5% of the Fund’s total assets in securities of any one investment company; and (3) investing more than 10% of the Fund’s total assets in securities of all investment companies. These restrictions may not apply to certain investments in money market funds. The Fund may invest in other investment companies to the extent permitted by any rule under the 1940 Act or any interpretation thereunder or order granted by the SEC. The Fund indirectly will bear its proportionate share of any management fees and other expenses paid by the investment companies in which the Fund invests in addition to the fees and expenses the Fund bears directly in connection with its own operations. These securities represent interests in professionally managed portfolios that may invest in various types of instruments pursuant to a wide range of investment styles. Investing in other investment companies involves substantially the same risks as investing directly in the underlying instruments, but may involve duplicative management and advisory fees and operating expenses. Certain types of investment companies, such as closed-end investment companies, issue a fixed number of shares that trade on a stock exchange or OTC at a premium or a discount to their NAV per share. Others are continuously offered at NAV per share but may also be traded in the secondary market.

Lending of Portfolio Securities

The Fund may lend portfolio securities to certain broker/dealers and institutions to the extent permitted by the 1940 Act, as modified or interpreted by regulatory authorities having jurisdiction, from time to time, in accordance with procedures adopted by the Board. By lending its securities, the Fund attempts to increase its net investment income through the receipt of interest on the loan. Any gain or loss in the market price of the securities loaned that might occur during the term of the loan would belong to the Fund. Such loans must be secured by collateral in cash or U.S. government securities maintained on a current basis in an amount at least equal to 100% of the current market value of the securities loaned. The Fund may call a loan and obtain the securities loaned at any time generally on less than five days’ notice. For the duration of a loan, the Fund would continue to receive the equivalent of the interest or dividends paid by the issuer on the securities loaned and would also receive compensation from the investment of the collateral. The Fund would not, however, have the right to vote any securities having voting rights during the existence of the loan, but the Fund would call the loan in anticipation of an important vote to be taken among holders of the securities or of the giving or withholding of their consent on a material matter affecting the investment.

As with other extensions of credit, there are risks of delay in recovery of, or even loss of rights in, the collateral should the borrower of the securities fail financially or breach its agreement with the Fund. The Fund also bears the risk that the borrower may fail to return the securities in a timely manner or at all, either because the borrower fails financially or for other reasons. The Fund could experience delays and costs in recovering the loaned securities or in gaining access to and liquidating the collateral, which could result in actual financial loss and which could interfere with portfolio management decisions or the exercise of ownership rights in the loaned securities.

However, the loans would be made only to firms deemed by the Adviser or their agent to be creditworthy and when the consideration that can be earned currently from securities loans of this type, justifies the attendant risk. If the Adviser, as the case may be, determines to make securities loans, it is intended that the value of the securities loaned will not exceed 33 1/3% of the value of the total assets of the lending Fund.

While securities are on loan, the Fund is subject to: the risk that the borrower may default on the loan and that the collateral could be inadequate in the event the borrower defaults; the risk that the earnings on the collateral invested may not be sufficient to pay fees incurred in connection with the loan; the risk that the principal value of the collateral invested may decline and may not be sufficient to pay back the borrower for amount of the collateral posted; the risk that the borrower may use the loaned securities to cover a short sale which may place downward pressure on the market prices of the loaned securities; the risk that return of loaned securities could be delayed and could interfere with portfolio management decisions; and the risk that any efforts to recall the securities for purposes of voting may not be effective.

Mortgage-Related and Other Asset-Backed Securities

The Fund may buy mortgage-related and other asset-backed securities. Typically, mortgage-related securities are interests in pools of residential or commercial mortgage loans or leases, including mortgage loans made by S&L institutions, mortgage bankers, commercial banks and others. Pools of mortgage loans are assembled as securities for sale to investors by various governmental, government-related and private organizations (see “Mortgage Pass-Through Securities”).

Like other fixed-income securities, when interest rates rise, the value of a mortgage-related security generally will decline. However, when interest rates are declining, the value of a mortgage-related security with prepayment features may not increase as much as other fixed-income securities. The value of these securities may be significantly affected by changes in interest rates, the market’s perception of issuers and the creditworthiness of the parties involved. The ability of the Fund to successfully utilize these instruments may depend in part upon the ability of the Adviser to forecast interest rates and other economic factors correctly. Some securities may have a structure that makes their reaction to interest rate changes and other factors difficult to predict, making their value highly volatile. These securities may also be subject to prepayment risk and, if the security has been purchased at a premium, the amount of the premium would be lost in the event of prepayment.

The Fund, to the extent permitted in the Prospectus, or otherwise limited herein, may also invest in debt securities that are secured with collateral consisting of mortgage-related securities (see “Collateralized Mortgage Obligations”), and in other types of mortgage-related securities. While principal and interest payments on some mortgage-related securities may be guaranteed by the U.S. government, government agencies or other guarantors, the market value of such securities is not guaranteed.

Generally, the Fund will invest in mortgage-related (or other asset-backed) securities either (1) issued by U.S. government-sponsored corporations such as Government National Mortgage Association (“GNMA”), the Federal Home Loan Mortgage Corporation (“FHLMC”), and Federal National Mortgage Association (“FNMA”), or (2) privately issued securities rated Baa3 or better by Moody’s or BBB- or better by S&P or, if not rated, of comparable investment quality as determined by the Adviser. In addition, if any mortgage-related (or other asset-backed) security is determined to be illiquid, the Fund will limit its investments in these and other illiquid instruments subject to the Fund’s limitation on investments in illiquid securities.

During past market disruptions, rating agencies have placed on credit watch or downgraded the ratings previously assigned to a large number of mortgage-related securities (which may include certain of the mortgage-related securities in which the Fund may invest), and may do so in the future. If a mortgage-related security in which the Fund is invested is placed on credit watch or downgraded, the value of the security may decline, and the Fund may experience losses.

Further, such disruptions in the residential mortgage-related securities market (and in particular, the “sub-prime” residential mortgage market), the broader mortgage-related securities market and the asset-backed securities market have in the past resulted in downward price pressures and increasing foreclosures and defaults in residential and commercial real estate. Concerns over inflation, energy costs, geopolitical issues, the availability and cost of credit, the mortgage market and a declining real estate market have in the past contributed to increased volatility and diminished expectations for the economy and markets, and contributed to dramatic declines in the housing market, with falling home prices and increasing foreclosures and unemployment, and significant asset write-downs by financial institutions. Additionally, a lack of credit liquidity and decreases in the value of real property may prevent borrowers from refinancing their mortgages, which may increase the likelihood of default on their mortgage loans.

Poor economic conditions may reduce the cash flow that the Fund receives from such securities and increase the incidence and severity of credit events and losses in respect of such securities. In the event that interest rate spreads for mortgage-related securities widen following the purchase of such assets by the Fund, the market value of such securities is likely to decline and, in the case of a substantial spread widening, could decline by a substantial amount. Furthermore, adverse changes in market conditions could result in a severe liquidity crisis in the market for mortgage-backed securities (including the mortgage-related securities in which the Fund may invest) and increasing unwillingness by banks, financial institutions and investors to extend credit to servicers, originators and other participants in the mortgage-related securities market for these securities and other asset-backed securities. As a result, the liquidity and/or the market value of any mortgage-related securities that are owned by the Fund may experience declines after they are purchased by the Fund.

In addition, the U.S. government, including the Federal Reserve, the Treasury, and other governmental and regulatory bodies may take actions to address financial crises, including initiatives to limit large-scale losses associated with mortgage-related securities held on the books of certain U.S. financial institutions and to support the credit markets generally. The impact that such actions could have on any of the mortgage-related securities that may be held by the Fund is unknown.

Mortgage Pass-Through Securities. The Fund may invest in mortgage pass-through securities. Mortgage pass-through securities are interests in pools of mortgage-related securities. Unlike interests in other forms of debt securities, which normally provide for periodic payment of interest in fixed amounts with the payment of principal being made at maturity or specified call dates, these securities provide a monthly payment that consists of both interest and principal payments. In effect, these payments are a “pass-through” of the monthly payments made by the individual borrowers on their residential mortgage loans, net of any fees paid to the issuer or guarantor of such securities. Additional payments are caused by repayments of principal resulting from the sale of the underlying residential property, refinancing or foreclosure, net of fees or costs that may be incurred. Some mortgage-related securities (such as securities issued by GNMA) are described as “modified pass-through.” These securities entitle the holder to receive all interest and principal payments owed on the mortgage pool, net of certain fees, at the scheduled payment dates, regardless of whether or not the mortgagor actually makes the payment. Some mortgage pass-through certificates may include securities backed by adjustable-rate mortgages that bear interest at a rate that will be adjusted periodically.

Early repayment of principal on mortgage pass-through securities (arising from prepayments of principal due to sale of the underlying property, refinancing, or foreclosure, net of fees and costs that may be incurred) may expose the Fund to a lower rate of return upon reinvestment of principal. Also, if a security subject to prepayment has been purchased at a premium, in the event of prepayment, the value of the premium would be lost. Reinvestments of prepayments may occur at lower interest rates than the original investment, thus adversely affecting the Fund’s yield. Prepayments may cause the yield of a mortgage-backed security to differ from what was assumed when the Fund purchased the security. Prepayments at a slower rate than expected may lengthen

the effective life of a mortgage-backed security. The value of securities with longer effective lives generally fluctuates more widely in response to changes in interest rates than the value of securities with shorter effective lives.

Payment of principal and interest on some mortgage pass-through securities (but not the market value of the securities themselves) may be guaranteed by the full faith and credit of the U.S. government (in the case of securities guaranteed by GNMA); or guaranteed by agencies or instrumentalities of the U.S. government (in the case of securities guaranteed by FNMA or FHLMC), which are supported only by the discretionary authority of the U.S. government to purchase the agency's obligations. Mortgage pass-through securities created by nongovernmental issuers (such as commercial banks, savings and loan institutions, private mortgage insurance companies, mortgage bankers, and other secondary market issuers) may be supported by various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance and letters of credit, which may be issued by governmental entities, private insurers, or the mortgage poolers.

Historically, FNMA and FHLMC were government-sponsored corporations owned entirely by private stockholders. However, in September 2008, in response to concerns regarding the safety and soundness of FNMA and FHLMC, the U.S. Treasury announced that FNMA and FHLMC had been placed in conservatorship by the Federal Housing Finance Agency ("FHFA"), a newly created independent regulator. While FNMA and FHLMC continue to be owned entirely by private shareholders, under the conservatorship, the FHFA has taken over powers formerly held by each entity's shareholders, directors, and officers. In addition to placing the companies in conservatorship, the U.S. Treasury announced additional steps that it intended to take with respect to FNMA and FHLMC in order to support the conservatorship, although some steps have since ended. No assurance can be given that these initiatives will be successful in preserving the safety and soundness of FNMA and FHLMC or ensuring their continued viability.

GNMA Certificates. The principal governmental guarantor of mortgage-related securities is GNMA. GNMA is a wholly owned U.S. government corporation within the U.S. Department of Housing and Urban Development ("HUD"). GNMA is authorized to guarantee, with the full faith and credit of the U.S. government, the timely payment of principal and interest on securities issued by institutions approved by GNMA (such as S&Ls, commercial banks and mortgage bankers) and backed by pools of FHA-insured or Veterans Administration-guaranteed mortgages. In order to meet its obligations under such guarantee, GNMA is authorized to borrow from the U.S. Treasury with no limitations as to amount. GNMA certificates differ from typical bonds because principal is repaid monthly over the term of the loan rather than returned in a lump sum at maturity. Although GNMA guarantees timely payment even if homeowners delay or default, tracking the pass-through" payments may, at times, be difficult. Expected payments may be delayed due to the delays in registering the newly traded paper securities. The custodian's policies for crediting missed payments while errant receipts are tracked down may vary.

Government-related guarantors (*i.e.*, not backed by the full faith and credit of the U.S. government) include FNMA and FHLMC. FNMA is a government-sponsored corporation owned entirely by private stockholders. It is subject to general regulation by HUD and acts as a government instrumentality under authority granted by Congress. FNMA purchases conventional (*i.e.*, not insured or guaranteed by any government agency) residential mortgages from a list of approved seller/servicers that includes state and federally chartered S&Ls, mutual savings banks, commercial banks, credit unions and mortgage bankers. Pass-through securities issued by FNMA are guaranteed as to timely payment of principal and interest by FNMA but are not backed by the full faith and credit of the U.S. government. FNMA is authorized to borrow from the U.S. Treasury to meet its obligations.

FHLMC was created by Congress in 1970 for the purpose of increasing the availability of mortgage credit for residential housing. It is a government-sponsored corporation formerly owned by the twelve Federal Home Loan

Banks and is now owned entirely by private stockholders. FHLMC issues Participation Certificates (“PCs”) that represent interests in conventional mortgages from FHLMC’s national portfolio. FHLMC guarantees the timely payment of interest and collection of principal, but PCs are not backed by the full faith and credit of the U.S. government.

If either fixed or variable rate pass-through securities issued by the U.S. government or its agencies or instrumentalities are developed in the future, the Fund reserves the right to invest in them.

Although the mortgage loans in the pool underlying a GNMA certificate will have maturities of up to 30 years, the actual average life of a GNMA certificate typically will be substantially less because the mortgages will be subject to normal principal amortization and may be prepaid prior to maturity.

Private Mortgage Pass-Through Securities. Commercial banks, S&Ls, private mortgage insurance companies, mortgage bankers and other secondary market issuers also create pass-through pools of conventional residential mortgage loans. Such issuers may, in addition, be the originators and/or servicers of the underlying mortgage loans as well as the guarantors of the mortgage-related securities. Pools created by such non-governmental issuers generally offer a higher rate of interest than government and government-related pools because there are no direct or indirect government or agency guarantees of payments in the former pools. However, timely payment of interest and principal of these pools may be supported by various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance and letters of credit. The insurance and guarantees are issued by governmental entities, private insurers and the mortgage poolers. Such insurance and guarantees and the creditworthiness of the issuers thereof will be considered in determining whether a mortgage-related security meets the Fund’s investment quality standards. There can be no assurance that the private insurers or guarantors can meet their obligations under the insurance policies or guarantee arrangements. The Fund may buy mortgage-related securities without insurance or guarantees if, through an examination of the loan experience and practices of the originator/servicers and poolers, the Adviser determines that the securities meet the Fund’s quality standards. Although the market for such securities is becoming increasingly liquid, securities issued by certain private organizations may not be readily marketable. The Fund may purchase mortgage-related securities or any other assets that, in the opinion of the Adviser, are illiquid, subject to the Fund’s limitation on investments in illiquid securities.

Collateralized Mortgage Obligations (“CMOs”). A CMO is a hybrid between a mortgage-backed bond and a mortgage pass-through security. Similar to a bond, interest and prepaid principal is paid, in most cases, semiannually. CMOs may be collateralized by whole mortgage loans, but are more typically collateralized by portfolios of mortgage pass-through securities guaranteed by GNMA, FHLMC or FNMA, and their income streams. CMOs may offer a higher yield than U.S. government securities, but they may also be subject to greater price fluctuation and credit risk. In addition, CMOs typically will be issued in a variety of classes or series, which have different maturities and are retired in sequence. Privately issued CMOs are not government securities, nor are they supported in any way by any governmental agency or instrumentality. In the event of a default by an issuer of a CMO, there is no assurance that the collateral securing such CMO will be sufficient to pay principal and interest. It is possible that there will be limited opportunities for trading CMOs in the OTC market, the depth and liquidity of which will vary from time to time.

CMOs are typically structured into multiple classes or series, each bearing a different stated maturity. Actual maturity and average life will depend upon the prepayment experience of the collateral. CMOs provide for a modified form of call protection through a de facto breakdown of the underlying pool of mortgages according to how quickly the loans are repaid. Monthly payment of principal received from the pool of underlying mortgages, including prepayments, is first returned to investors holding the shortest maturity class. Investors holding the

longer maturity classes receive principal only after the first class has been retired. An investor is partially guarded against a sooner than desired return of principal because of the sequential payments.

For example, if it is probable that the issuer of an instrument will take advantage of a maturity-shortening device, such as a call, refunding, or redemption provision, the date on which the instrument will probably be called, refunded, or redeemed may be considered to be its maturity date. Also, the maturities of mortgage securities, including collateralized mortgage obligations, and some asset-backed securities are determined on a weighted average life basis, which is the average time for principal to be repaid. For a mortgage security, this average time is calculated by estimating the timing of principal payments, including unscheduled prepayments, during the life of the mortgage. The weighted average life of these securities is likely to be substantially shorter than their stated final maturity.

An obligation's maturity is typically determined on a stated final maturity basis, although there are some exceptions to this rule. Dollar-weighted average maturity is derived by multiplying the value of each investment by the time remaining to its maturity, adding these calculations, and then dividing the total by the value of the Fund's portfolio holdings. In a typical CMO transaction, a corporation ("issuer") issues multiple series (*e.g.*, A, B, C, Z) of CMO bonds ("Bonds"). Proceeds of the Bond offering are used to purchase mortgages or mortgage pass-through certificates ("Collateral"). The Collateral is pledged to a third-party trustee as security for the Bonds. Principal and interest payments from the Collateral are used to pay principal on the Bonds in the order A, B, C, Z. The Series A, B, and C Bonds all bear current interest. Interest on the Series Z Bond is accrued and added to principal and a like amount is paid as principal on the Series A, B, or C Bonds currently being paid off. When the Series A, B, and C Bonds are paid in full, interest and principal on the Series Z Bond begins to be paid currently. With some CMOs, the issuer serves as a conduit to allow loan originators (primarily builders or S&Ls) to borrow against their loan portfolios.

The primary risk of CMOs is the uncertainty of the timing of cash flows that results from the rate of prepayments on the underlying mortgages serving as collateral and from the structure of the particular CMO transaction (that is, the priority of the individual tranches). An increase or decrease in prepayment rates (resulting from a decrease or increase in mortgage interest rates) will affect the yield, average life, and price of CMOs. The prices of certain CMOs, depending on their structure and the rate of prepayments, can be volatile. Some CMOs may also not be as liquid as other securities.

FHLMC Collateralized Mortgage Obligations ("FHLMC CMOs"). FHLMC CMOs are debt obligations of FHLMC issued in multiple classes having different maturity dates that are secured by the pledge of a pool of conventional mortgage loans purchased by FHLMC. Unlike FHLMC PCs, payments of principal and interest on the FHLMC CMOs are made semiannually, as opposed to monthly. The amount of principal payable on each semiannual payment date is determined in accordance with FHLMC's mandatory sinking fund schedule, which, in turn, is equal to approximately 100% of FHA prepayment experience applied to the mortgage collateral pool. All sinking fund payments in the CMOs are allocated to the retirement of the individual classes of bonds in the order of their stated maturities. Payment of principal on the mortgage loans in the collateral pool in excess of the amount of FHLMC's minimum sinking fund obligation for any payment date are paid to the holders of the CMOs as additional sinking fund payments. Because of the "pass-through" nature of all principal payments received on the collateral pool in excess of FHLMC's minimum sinking fund requirement, the rate at which principal of the CMOs is actually repaid is likely to be such that each class of bonds will be retired in advance of its scheduled maturity date.

If collection of principal (including prepayments) on the mortgage loans during any semi-annual payment period is not sufficient to meet FHLMC's minimum sinking fund obligation on the next sinking fund payment date, FHLMC agrees to make up the deficiency from its general funds.

Criteria for the mortgage loans in the pool backing the CMOs are identical to those of FHLMC PCs. FHLMC has the right to substitute collateral in the event of delinquencies and/or defaults.

Other Mortgage-Related Securities. Other mortgage-related securities include securities other than those described above that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property, including CMO residuals or stripped mortgage-backed securities, and may be structured in classes with rights to receive varying proportions of principal and interest. Other mortgage-related securities may be equity or debt securities issued by agencies or instrumentalities of the U.S. government or by private originators of, or investors in, mortgage loans, including S&Ls, homebuilders, mortgage banks, commercial banks, investment banks, partnerships, trusts and special purpose entities of the foregoing.

The Adviser expects that governmental, government-related or private entities may create mortgage loan pools and other mortgage-related securities offering mortgage pass-through and mortgage-collateralized investments in addition to those described above. The mortgages underlying these securities may include alternative mortgage instruments, that is, mortgage instruments whose principal or interest payments may vary or whose terms to maturity may differ from customary long-term fixed rate mortgages. As new types of mortgage-related securities are developed and offered to investors, the Adviser will, consistent with the Fund's investment objectives, policies and quality standards, consider making investments in such new types of mortgage-related securities.

CMO Residuals. CMO residuals are derivative mortgage securities issued by agencies or instrumentalities of the U.S. government or by private originators of, or investors in, mortgage loans, including S&Ls, homebuilders, mortgage banks, commercial banks, investment banks and special purpose entities of the foregoing.

The cash flow generated by the mortgage assets underlying a series of CMOs is applied first to make required payments of principal and interest on the CMOs and second to pay the related administrative expenses of the issuer. The residual in a CMO structure generally represents the interest in any excess cash flow remaining after making the foregoing payments. Each payment of such excess cash flow to a holder of the related CMO residual represents income and/or a return of capital. The amount of residual cash flow resulting from a CMO will depend on, among other things, the characteristics of the mortgage assets, the coupon rate of each class of CMO, prevailing interest rates, the amount of administrative expenses and the prepayment experience on the mortgage assets. In particular, the yield to maturity on CMO residuals is extremely sensitive to prepayments on the related underlying mortgage assets, in the same manner as an interest-only class of stripped mortgage-backed securities. See "Stripped Mortgage-Backed Securities." In addition, if a series of a CMO includes a class that bears interest at an adjustable rate, the yield to maturity on the related CMO residual will also be extremely sensitive to changes in the level of the index upon which interest rate adjustments are based. As described below with respect to stripped mortgage-backed securities, in certain circumstances, a portfolio may fail to recoup fully its initial investment in a CMO residual.

CMO residuals are generally purchased and sold by institutional investors through several investment banking firms acting as brokers or dealers. The CMO residual market has only very recently developed and CMO residuals currently may not have the liquidity of other more established securities trading in other markets. Transactions in CMO residuals are generally completed only after careful review of the characteristics of the securities in question. In addition, CMO residuals may or, pursuant to an exemption therefrom, may not have been registered under the 1933 Act. CMO residuals, whether or not registered under the 1933 Act, may be subject to certain restrictions on transferability, and may be deemed "illiquid" and subject to the Fund's limitations on investment in illiquid securities.

Under certain circumstances, the Fund's investment in residual interests in "real estate mortgage investment conduits" ("REMICs") may cause shareholders of the Fund to be deemed to have taxable income in addition to their Fund dividends and distributions, and such income may not be eligible to be reduced for tax purposes by certain deductible amounts, including net operating loss deductions. In addition, in some cases, the Fund may be required to pay taxes on certain amounts deemed to be earned from a REMIC residual interest. Prospective investors may wish to consult their tax advisors regarding REMIC residual investments by the Fund.

CMOs and REMICs may offer a higher yield than U.S. government securities, but they may also be subject to greater price fluctuation and credit risk. In addition, CMOs and REMICs typically will be issued in a variety of classes or series, which have different maturities and are retired in sequence. Privately issued CMOs and REMICs are not government securities, nor are they supported in any way by any governmental agency or instrumentality. In the event of a default by an issuer of a CMO or a REMIC, there is no assurance that the collateral securing such CMO or REMIC will be sufficient to pay principal and interest. It is possible that there will be limited opportunities for trading CMOs and REMICs in the OTC market, the depth and liquidity of which will vary from time to time. Holders of "residual" interests in REMICs (including the Fund) could be required to recognize potential phantom income, as could shareholders (including unrelated business taxable income for tax-exempt shareholders). The Fund will consider this rule in determining whether to invest in residual interests.

Stripped Mortgage-Backed Securities ("SMBS"). SMBS are derivative multi-class mortgage securities. SMBS may be issued by agencies or instrumentalities of the U.S. government, or by private originators of, or investors in, mortgage loans, including S&Ls, mortgage banks, commercial banks, investment banks and special purpose entities of the foregoing.

SMBS are usually structured with two classes that receive different proportions of the interest and principal distributions on a pool of mortgage assets. A common type of SMBS will have one class receiving some of the interest and most of the principal from the mortgage assets, while the other class will receive most of the interest and the remainder of the principal. In the most extreme case, one class will receive all of the interest (the interest-only or "IO" class), while the other class will receive all of the principal (the principal-only or "PO" class). The yield to maturity on an IO class is extremely sensitive to the rate of principal payments (including prepayments) on the related underlying mortgage assets, and a rapid rate of principal payments may have a material adverse effect on the Fund's yield to maturity from these securities. If the underlying mortgage assets experience greater than anticipated prepayments of principal, the Fund may fail to fully recoup its initial investment in these securities even if the security is in one of the highest rating categories.

Although SMBS are purchased and sold by institutional investors through several investment banking firms acting as brokers or dealers, these securities were only recently developed. As a result, established trading markets have not yet developed and, accordingly, these securities may be deemed "illiquid" and subject to the Fund's limitations on investment in illiquid securities.

Risks Associated with Mortgage-Backed Securities. As in the case with other fixed-income securities, when interest rates rise, the value of a mortgage-backed security generally will decline; however, when interest rates are declining, the value of mortgage-backed securities with prepayment features may not increase as much as other fixed-income securities. The value of some mortgage-backed securities in which the Fund may invest may be particularly sensitive to changes in prevailing interest rates, and, like the other investments of the Fund, the ability of the Fund to successfully utilize these instruments may depend in part upon the ability of the Adviser to forecast interest rates and other economic factors correctly. If the Adviser incorrectly forecasts such factors and has taken a position in mortgage-backed securities that is or becomes contrary to prevailing market trends, the Fund could be exposed to the risk of a loss.

Investment in mortgage-backed securities poses several risks, including prepayment, extension market, and credit risk. Prepayment risk reflects the chance that borrowers may prepay their mortgages faster than expected, thereby affecting the investment's average life and perhaps its yield. Whether or not a mortgage loan is prepaid is almost entirely controlled by the borrower. Borrowers are most likely to exercise their prepayment options at a time when it is least advantageous to investors, generally prepaying mortgages as interest rates fall, and slowing payments as interest rates rise. Conversely, when interest rates are rising, the rate of prepayment tends to decrease, thereby lengthening the average life of the mortgage-backed security. Besides the effect of prevailing interest rates, the rate of prepayment and refinancing of mortgages may also be affected by changes in home values, ease of the refinancing process and local economic conditions.

Market risk reflects the chance that the price of the security may fluctuate over time. The price of mortgage-backed securities may be particularly sensitive to prevailing interest rates, the length of time the security is expected to be outstanding, and the liquidity of the issue. In a period of unstable interest rates, there may be decreased demand for certain types of mortgage-backed securities, and the Fund may find it difficult to find a buyer, which may in turn decrease the price at which the securities may be sold.

Credit risk reflects the chance that the Fund may not receive all or part of its principal because the issuer or credit enhancer has defaulted on its obligations. Obligations issued by U.S. government-related entities are guaranteed as to the payment of principal and interest, but are not backed by the full faith and credit of the U.S. government. The performance of private label mortgage-backed securities issued by private institutions is based on the financial health of those institutions.

To the extent that mortgages underlying a mortgage-related security are so-called "sub-prime mortgages" (*i.e.*, mortgages granted to borrowers whose credit history is not sufficient to obtain a conventional mortgage), the risk of default is higher. Sub-prime mortgages also have higher serious delinquency rates than prime loans. The downturn in the sub-prime mortgage lending market may have far-reaching consequences into various aspects of the financials sector, and consequently, the value of the Fund may decline in response to such developments.

Other Asset-Backed Securities. The Adviser expects that other asset-backed securities (unrelated to mortgage loans) will be offered to investors in the future. Several types of asset-backed securities have already been offered to investors, including credit card receivables and Certificates for Automobile Receivables^(SM) ("CARs^(SM)"). CARs^(SM) represent undivided fractional interests in a trust whose assets consist of a pool of motor vehicle retail installment sales contracts and security interests in the vehicles securing the contracts. Payments of principal and interest on CARs^(SM) are passed-through monthly to certificate holders, and are guaranteed up to certain amounts and for a certain time period by a letter of credit issued by a financial institution unaffiliated with the trustee or originator of the trust.

An investor's return on CARs^(SM) may be affected by early prepayment of principal on the underlying vehicle sales contracts. If the letter of credit is exhausted, the trust may be prevented from realizing the full amount due on a sales contract because of state law requirements and restrictions relating to foreclosure sales of vehicles and the obtaining of deficiency judgments following such sales or because of depreciation, damage or loss of a vehicle, the application of federal and state bankruptcy and insolvency laws, or other factors. As a result, certificate holders may experience delays in payments or losses if the letter of credit is exhausted.

If consistent with the Fund's investment objective and policies, the Fund also may invest in other types of asset-backed securities. Certain asset-backed securities may present the same types of risks that may be associated with mortgage-backed securities.

Municipal Securities

The Fund will purchase municipal securities. Municipal securities generally are understood to include debt obligations of state and local governments, agencies and authorities. Municipal securities, which may be issued in various forms, including bonds and notes, are issued to obtain funds for various public purposes.

Municipal bonds are debt obligations issued by states, municipalities and other political subdivisions, agencies, authorities and instrumentalities of states and multi-state agencies or authorities (collectively, “municipalities”).

Municipal bonds include securities from a variety of sectors, each of which has unique risks. They include, but are not limited to, general obligation bonds, limited obligation bonds, and revenue bonds (including industrial development bonds issued pursuant to federal tax law). General obligation bonds are obligations involving the credit of an issuer possessing taxing power and are payable from such issuer’s general revenues and not from any particular source. Limited obligation bonds are payable only from the revenues derived from a particular facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source. Revenue bonds are issued for either project or enterprise financings in which the bond issuer pledges to the bondholders the revenues generated by the operating projects financed from the proceeds of the bond issuance. Revenue bonds involve the credit risk of the underlying project or enterprise (or its corporate user) rather than the credit risk of the issuing municipality. Under the Code, certain limited obligation bonds are considered “private activity bonds” and interest paid on such bonds is treated as an item of tax preference for purposes of calculating federal alternative minimum tax liability. Tax-exempt private activity bonds and industrial development bonds generally are also classified as revenue bonds and thus are not payable from the issuer’s general revenues. The credit and quality of private activity bonds and industrial development bonds are usually related to the credit of the corporate user of the facilities. Payment of interest on and repayment of principal of such bonds are the responsibility of the corporate user (and/or any guarantor).

Some municipal bonds may be issued as variable or floating rate securities and may incorporate market-dependent liquidity features. Some longer-term municipal bonds give the investor the right to “put” or sell the security at par (face value) within a specified number of days following the investor’s request—usually one to seven days. This demand feature enhances a security’s liquidity by shortening its effective maturity and enables it to trade at a price equal to or very close to par. If a demand feature terminates prior to being exercised, the Fund would hold the longer-term security, which could experience substantially more volatility. Municipal bonds that are issued as variable or floating rate securities incorporating market-dependent liquidity features may have greater liquidity risk than other municipal bonds.

Some municipal bonds feature credit enhancements, such as lines of credit, letters of credit, municipal bond insurance, and standby bond purchase agreements (“SBPAs”). SBPAs include lines of credit that are issued by a third party, usually a bank, to enhance liquidity and ensure repayment of principal and any accrued interest if the underlying municipal bond should default. Municipal bond insurance, which is usually purchased by the bond issuer from a private, non-governmental insurance company, provides an unconditional and irrevocable assurance that the insured bond’s principal and interest will be paid when due. Insurance does not guarantee the price of the bond or the share price of the Fund.

The credit rating of an insured bond may reflect the credit rating of the insurer, based on its claims-paying ability. The obligation of a municipal bond insurance company to pay a claim extends over the life of each insured bond. Although defaults on insured municipal bonds have historically been low and municipal bond insurers historically have met their claims, there is no assurance this will continue. A higher-than-expected default rate could strain the insurer’s loss reserves and adversely affect its ability to pay claims to bondholders. The number of municipal bond insurers is relatively small, and not all of them have the highest credit rating. An SBPA can include a liquidity facility that is provided to pay the purchase price of any bonds that cannot be remarketed. The

obligation of the liquidity provider (usually a bank) is only to advance funds to purchase tendered bonds that cannot be remarketed and does not cover principal or interest under any other circumstances. The liquidity provider's obligations under the SBPA are usually subject to numerous conditions, including the continued creditworthiness of the underlying borrower or bond issuer.

Municipal bonds also include tender option bonds, which are municipal derivatives created by dividing the income stream provided by an underlying municipal bond to create two securities issued by a special-purpose trust, one short-term and one long-term. The interest rate on the short-term component is periodically reset. The short-term component has negligible interest rate risk, while the long-term component has all of the interest rate risk of the original bond. After income is paid on the short-term securities at current rates, the residual income goes to the long-term securities.

Therefore, rising short-term interest rates result in lower income for the longer-term portion, and vice versa. The longer-term components can be very volatile and may be less liquid than other municipal bonds of comparable maturity. These securities have been developed in the secondary market to meet the demand for short-term, tax-exempt securities.

Prices and yields on municipal bonds are dependent on a variety of factors, including general money-market conditions, the financial condition of the issuer, general conditions of the municipal bond market, the size of a particular offering, the maturity of the obligation and the rating of the issue. A number of these factors, including the ratings of particular issues, are subject to change from time to time. Information about the financial condition of an issuer of municipal bonds may not be as extensive as that which is made available by corporations whose securities are publicly traded. Tax Anticipation Notes are used to finance working capital needs of municipalities and are issued in anticipation of various seasonal tax revenues, to be payable from these specific future taxes. They are usually general obligations of the issuer, secured by the taxing power for the payment of principal and interest.

Municipal securities also include various forms of notes. These notes include, but are not limited to, the following types:

- Revenue anticipation notes which are issued in expectation of receipt of other kinds of revenue, such as federal revenues. They, also, are usually general obligations of the issuer.
- Bond anticipation notes which are normally issued to provide interim financial assistance until long-term financing can be arranged. The long-term bonds then provide funds for the repayment of the notes.
- Construction loan notes which are sold to provide construction financing for specific projects. After successful completion and acceptance, many projects receive permanent financing through the Federal Housing Administration ("FHA") under the FNMA or GNMA.
- Project notes which are instruments sold by HUD but issued by a state or local housing agency to provide financing for a variety of programs. They are backed by the full faith and credit of the U.S. government, and generally carry a term of one year or less.
- Short-term discount notes (tax-exempt commercial paper), which are short-term (365 days or less) promissory notes issued by municipalities to supplement their cash flow.

An entire issue of municipal securities may be purchased by one or a small number of institutional investors such as the Fund. Thus, the issue may not be said to be publicly offered. Unlike securities that must be registered under the 1933 Act prior to offer and sale, unless an exemption from such registration is available, municipal securities that are not publicly offered may nevertheless be readily marketable. A secondary market may exist for municipal securities that were not publicly offered initially.

Municipal securities are subject to credit risk. Information about the financial condition of an issuer of municipal securities may not be as extensive as that which is made available by corporations whose securities are publicly traded. Obligations of issuers of municipal securities are subject to the provisions of bankruptcy, insolvency, and other laws affecting the rights and remedies of creditors. Congress or state legislatures may seek to extend the time for payment of principal or interest, or both, or to impose other constraints upon enforcement of such obligations. There is also the possibility that, as a result of litigation or other conditions, the power or ability of issuers to meet their obligations for the payment of interest and principal on their municipal securities may be materially affected or their obligations may be found to be invalid or unenforceable. Such litigation or conditions may from time to time have the effect of introducing uncertainties in the market for municipal securities or certain segments thereof, or of materially affecting the credit risk with respect to particular bonds. Adverse economic, business, legal, or political developments might affect all or a substantial portion of the Fund's municipal securities in the same manner.

Municipal securities are subject to interest rate risk. Interest rate risk is the chance that security prices overall will decline over short or even long periods because of rising interest rates. Interest rate risk is higher for long-term bonds, whose prices are more sensitive to interest rate changes than are the prices of shorter-term bonds. Generally, prices of longer maturity issues tend to fluctuate more than prices of shorter maturity issues. Prices and yields on municipal securities are dependent on a variety of factors, such as the financial condition of the issuer, general conditions of the municipal securities market, the size of a particular offering, the maturity of the obligation and the rating of the issue. A number of these factors, including the ratings of particular issues, are subject to change from time to time.

Municipal bonds are subject to call risk. Call risk is the chance that during periods of falling interest rates, a bond issuer will call—or repay—a higher-yielding bond before its maturity date. Forced to reinvest the unanticipated proceeds at lower interest rates, the Fund would experience a decline in income and lose the opportunity for additional price appreciation associated with falling rates. Call risk is generally high for long-term bonds. Municipal bonds may be deemed to be illiquid as determined by or in accordance with methods adopted by the Board.

High yield municipal bonds are subject to increased liquidity and valuation risk as compared to other municipal bonds and to high yield debt securities generally. There may be no active market for a high yield municipal bond, or it may trade in secondary markets on an infrequent basis. High yield municipal bonds may be more likely than other municipal bonds to be considered illiquid and therefore to be subject to the Fund's limitation on investments in illiquid securities. It may be difficult for the Fund to obtain an accurate or recent market quotation for a high yield municipal bond, which may cause the security to be "fair valued" in accordance with the fair valuation policies established by the Board. For a more general discussion of the risks associated with high yield securities, which generally also are applicable to high yield municipal bonds, see "High Yield Securities."

There are, in addition, a variety of hybrid and special types of municipal obligations, such as municipal lease obligations, as well as numerous differences in the security of municipal securities both within and between the two principal classifications described above. Municipal lease obligations are municipal securities that may be supported by a lease or an installment purchase contract issued by state and local government authorities to acquire funds to obtain the use of a wide variety of equipment and facilities, such as fire and sanitation vehicles, computer equipment and other capital assets. These obligations, which may be secured or unsecured, are not general obligations and have evolved to make it possible for state and local governments to obtain the use of property and equipment without meeting constitutional and statutory requirements for the issuance of debt. Thus, municipal lease obligations have special risks not normally associated with municipal securities. These obligations frequently contain "non-appropriation" clauses that provide that the governmental issuer of the obligation has no obligation to make future payments under the lease or contract unless money is appropriated

for such purposes by the legislative body on a yearly or other periodic basis. In addition to the “non-appropriation” risk, many municipal lease obligations have not yet developed the depth of marketability associated with municipal bonds; moreover, although the obligations may be secured by the leased equipment, the disposition of the equipment in the event of foreclosure might prove difficult. For the purpose of the Fund’s investment restrictions, the identification of the “issuer” of municipal securities that are not general obligation bonds is made by the Adviser on the basis of the characteristics of the municipal securities as described above, the most significant of which is the source of funds for the payment of principal of and interest on such securities.

The liquidity of municipal lease obligations purchased by the Fund will be determined pursuant to guidelines approved by the Board. Factors considered in making such determinations may include: the frequency of trades and quotes for the obligation; the number of dealers willing to purchase or sell the security and the number of other potential buyers; the willingness of dealers to undertake to make a market in the security; the nature of marketplace trades; the obligation’s rating; and, if the security is unrated, the factors generally considered by a rating agency. If municipal lease obligations are determined to be illiquid, then the Fund will limit its investment in these securities subject to its limitation on investments in illiquid securities.

The TRA limited the types and volume of municipal securities qualifying for the federal income tax exemption for interest, and the Code treats tax-exempt interest on certain municipal securities as a tax preference item included in the alternative minimum tax base for non-corporate shareholders. The Fund intends to monitor developments in the municipal bond market to determine whether any defensive action should be taken.

Unless at least 50% of the value of the Fund’s assets at the close of each quarter of its taxable year consists of qualifying municipal bonds, the Fund will not be eligible to pay tax-exempt distributions to its shareholders, even if the Fund receives income from municipal bonds.

U.S. Government Securities

Securities issued or guaranteed by the United States government or its agencies or instrumentalities include various U.S. Treasury securities, which differ only in their interest rates, maturities and times of issuance. U.S. Treasury bills have initial maturities of one year or less; U.S. Treasury notes have initial maturities of one to ten years; and U.S. Treasury bonds generally have initial maturities of greater than ten years. Some obligations issued or guaranteed by U.S. government agencies and instrumentalities, such as GNMA pass-through certificates, are supported by the full faith and credit of the U.S. government. Other securities, such as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Treasury. Additionally, other securities, such as those issued by FNMA, are supported by the discretionary authority of the U.S. government to purchase certain obligations of the agency or instrumentality, while others, such as those issued by the Student Loan Marketing Association, are supported only by the credit of the agency or instrumentality. U.S. government securities also include government-guaranteed mortgage-backed securities.

While the U.S. government provides financial support to U.S. government-sponsored agencies or instrumentalities, no assurance can be given that it will always do so, and it is not so obligated by law. Because the U.S. government is not obligated by law to provide support to an instrumentality it sponsors, the Fund will invest in obligations issued by such an instrumentality only if the Adviser determines that the credit risk with respect to the instrumentality does not make its securities unsuitable for investment by the Fund.

U.S. government securities do not generally involve the credit risks associated with other types of interest bearing securities. As a result, the yields available from U.S. government securities are generally lower than the yields available from other interest bearing securities. Like other fixed-income securities, the values of U.S. government securities change as interest rates fluctuate. When interest rates decline, the values of U.S. government securities

can be expected to increase, and when interest rates rise, the values of U.S. government securities can be expected to decrease.

When-Issued Securities

The Fund may from time to time purchase securities on a “when-issued” basis. When purchasing a security on a when-issued basis, the Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations, and takes such fluctuations into account when determining its NAV. Debt securities, including municipal securities, are often issued in this manner. The price of such securities, which may be expressed in yield terms, is fixed at the time a commitment to purchase is made, but delivery of and payment for the when-issued securities take place at a later date. Normally, the settlement date occurs within one month of the purchase (60 days for municipal bonds and notes). During the period between purchase and settlement, no payment is made by the Fund, and no interest accrues to the Fund. To the extent that assets of the Fund are held in cash pending the settlement of a purchase of securities, the Fund would earn no income; however, it is the Fund’s intention that the Fund will be fully invested to the extent practicable and subject to the policies stated herein and in the Prospectus. Although when-issued securities may be sold prior to the settlement date, the Fund intends to purchase such securities with the purpose of actually acquiring them unless a sale appears desirable for investment reasons.

When-issued transactions are entered into in order to secure what is considered to be an advantageous price and yield to the Fund and not for purposes of leveraging the Fund’s assets. However, the Fund will not accrue any income on these securities prior to delivery. The value of when-issued securities may vary prior to and after delivery depending on market conditions and changes in interest rate levels. There is a risk that a party with whom the Fund has entered into such transactions will not perform its commitment, which could result in a gain or loss to the Fund.

The Fund does not believe that the Fund’s NAV per share or income will be exposed to additional risk by the purchase of securities on a when-issued basis. At the time the Fund makes the commitment to purchase a security on a when-issued basis, it will record the transaction and reflect the amount due and the value of the security in determining the Fund’s NAV per share. The market value of the when-issued security may be more or less than the purchase price payable at the settlement date. Liquid assets are maintained to cover “senior securities transactions” which may include, but are not limited to, the Fund’s commitments to purchase securities on a when-issued basis. The value of the Fund’s “senior securities” holdings are marked-to-market daily to ensure proper coverage. Such securities either will mature or, if necessary, be sold on or before the settlement date.

Zero-Coupon Bonds

The Fund may purchase zero coupon bonds, which are debt obligations issued without any requirement for the periodic payment of interest. Zero coupon bonds are issued at a significant discount from their face value. The discount approximates the total amount of interest the bonds would accrue and compound over the period until maturity at a rate of interest reflecting the market rate at the time of issuance. Because interest on zero coupon obligations is not paid to the Fund on a current basis but is, in effect, compounded, the value of the securities of this type is subject to greater fluctuations in response to changing interest rates than the value of debt obligations that distribute income regularly. Zero coupon bonds tend to be subject to greater market risk than interest paying securities of similar maturities. The discount represents income, a portion of which the Fund must accrue and distribute every year even though the Fund receives no payment on the investment in that year. Zero coupon bonds tend to be more volatile than conventional debt securities.

Temporary Investments

The Fund may take temporary defensive measures that are inconsistent with the Fund’s normal fundamental or non-fundamental investment limitations and strategies in response to adverse market, economic, political, or other

conditions as determined by the Adviser. Such measures could include, but are not limited to, investments in (1) highly liquid short-term fixed income securities issued by or on behalf of municipal or corporate issuers, obligations of the U.S. Government and its agencies, commercial paper and bank certificates of deposit; (2) shares of other investment companies which have 12 investment objectives consistent with those of the Fund; (3) repurchase agreements involving any such securities; and (4) money market funds or other money market instruments. There is no limit on the extent to which the Fund may take temporary defensive measures. In taking such measures, the Fund may fail to achieve its investment objective.

Investment Restrictions

Fundamental Investment Restrictions

The Trust (on behalf of the Fund) has adopted the following restrictions as fundamental policies, which may not be changed without the favorable vote of the holders of a “majority of the outstanding voting securities” of the Fund, as defined under the 1940 Act. Under the 1940 Act, the vote of the holders of a “majority of the outstanding voting securities” means the vote of the holders of the lesser of (i) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented; or (ii) more than 50% of the outstanding shares of the Fund.

The Fund may not:

1. Borrow money or issue senior securities (as defined under the 1940 Act), except to the extent permitted under the 1940 Act;
2. Act as underwriter (except to the extent the Fund may be deemed to be an underwriter in connection with the sale of securities in its investment portfolio);
3. Concentrate its investments (*i.e.*, invest 25% or more of its net assets, calculated at the time of purchase and taken at market value), in securities of issuers in any one industry (other than (i) securities of other investment companies; (ii) securities issued or guaranteed as to principal and/or interest by the U.S. Government, its agencies or instrumentalities and tax-exempt securities of state or municipal governments and their political subdivisions, agencies or instrumentalities; or (iii) repurchase agreements collateralized by the instruments described in clause (ii));¹
4. Purchase or sell real estate unless acquired as a result of ownership of securities (although the Fund may purchase and sell securities that are secured by real estate and securities of companies that invest or deal in real estate);
5. Purchase or sell commodities, unless acquired as a result of ownership of securities or other instruments and provided that this restriction does not prevent the Fund from engaging in transactions involving currencies and futures contracts and options thereon or investing in securities or other instruments that are secured by commodities;
6. Make loans, except to the extent permitted under the 1940 Act; or

¹ For purposes of complying with this restriction, the Fund will look through to the investments in any underlying fund that has disclosure in its most recent prospectus stating that the underlying fund is concentrated in a particular industry or group of industries as the fund’s investment in such industry or group of industries. The Fund will treat investments in underlying funds without such disclosure as not being invested in any particular industry or group of related industries.

- Invest, under normal circumstances, less than 80% of its net assets (including borrowings for investment purposes) in municipal debt securities that pay interest that is exempt from regular federal income tax and Minnesota state income tax.

Non-Fundamental Investment Restriction

The following non-fundamental investment restriction is applicable to the Fund. Except as noted, the Fund may not:

- Invest 15% or more of the value of its net assets, taken at the time of investment, in illiquid securities.⁽¹⁾

⁽¹⁾ The term “illiquid security” is defined as a security that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the security.

Except with respect to the limitation on borrowing, if the Fund is in compliance with a percentage or rating restriction on investment or use of assets set forth herein or in the Prospectus at the time that a transaction is effected, later changes in percentage resulting from any cause other than actions by the Fund will not be considered a violation. To the extent that the income from a municipal bond is derived principally from the assets and revenues of non-government users, the securities will be deemed to be from the industry of that non-governmental user.

Exchange Listing and Trading

Shares are listed for trading and trade throughout the day on the Exchange.

There can be no assurance that the Fund will continue to meet the requirements of the Exchange necessary to maintain the listing of Shares. The Exchange may, but is not required to, remove Shares from the listing under any of the following circumstances: (i) the Exchange becomes aware that the Fund is no longer eligible to operate in reliance on Rule 6c-11 of the 1940 Act; (ii) the Fund no longer complies with the Exchange’s requirements for Shares; or (iii) such other event shall occur or condition shall exist that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. The Exchange will remove Shares of the Fund from listing and trading upon termination of the Fund.

The Trust reserves the right to adjust the price levels of Shares in the future to help maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the Fund.

Management of the Fund

Board of Trustees

The management and affairs of the Fund are supervised by the Board of Trustees. The Board of Trustees consists of four individuals. The Trustees are fiduciaries for the Fund’s shareholders and are governed by the laws of the State of Delaware in this regard. The Board of Trustees establishes policies for the operation of the Fund and appoints the officers who conduct the daily business of the Fund.

Trustees and Officers

The Trustees and officers of the Trust are listed below with their addresses, present positions with the Trust and principal occupations over at least the last five years.

Name, Address and Year of Birth	Position(s) Held with the Trust	Term of Office and Length of Time Served	Number of Portfolios in Trust Overseen by Trustee	Principal Occupation(s) During the Past Five Years	Other Directorships Held by Trustee During the Past Five Years
<i>Independent Trustees</i>					
Michael D. Akers, Ph.D. 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1955	Trustee	Indefinite Term; Since August 22, 2001	22	Professor Emeritus, Department of Accounting (June 2019-present), Professor, Department of Accounting (2004-May 2019), Chair, Department of Accounting (2004-2017), Marquette University.	Independent Trustee, USA MUTUALS (an open-end investment company) (2001-2021).
Gary A. Drska 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1956	Trustee	Indefinite Term; Since August 22, 2001	22	Pilot, Frontier/Midwest Airlines, Inc. (airline company) (1986-present).	Independent Trustee, USA MUTUALS (an open-end investment company) (2001-2021).
Jonas B. Siegel 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1943	Trustee	Indefinite Term; Since October 23, 2009	22	Retired (2011-present).	Independent Trustee, Gottex Trust (an open-end investment company) (2010-2016).
<i>Interested Trustee and Officers</i>					
Joseph C. Neuberger* 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1962	Chairperson and Trustee	Indefinite Term; Since August 22, 2001	22	President (2017-present), Chief Operating Officer (2016-2020), Executive Vice President (1994-2017), U.S. Bancorp Fund Services, LLC.	Trustee, Buffalo Funds (an open-end investment company) (2003-2017); Trustee, USA MUTUALS (an open-end investment company) (2001-2018).
John P. Buckel 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1957	President and Principal Executive Officer	Indefinite Term; Since January 24, 2013	N/A	Vice President, U.S. Bancorp Fund Services, LLC (2004-present).	N/A
Jennifer A. Lima 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1974	Vice President, Treasurer and Principal Financial and Accounting Officer	Indefinite Term; Since January 24, 2013	N/A	Vice President, U.S. Bancorp Fund Services, LLC (2002-present).	N/A

Elizabeth B. Scalf 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1985	Chief Compliance Officer, Vice President and Anti-Money Laundering Officer	Indefinite Term; Since July 1, 2017	N/A	Senior Vice President, U.S. Bancorp Fund Services, LLC (February 2017-present); Vice President and Assistant CCO, Heartland Advisors, Inc. (December 2016-January 2017); Vice President and CCO, Heartland Group, Inc. (May 2016-November 2016); Vice President, CCO and Senior Legal Counsel (May 2016-November 2016), Assistant CCO and Senior Legal Counsel (January 2016-April 2016), Heartland Advisors, Inc.	N/A
Jay S. Fitton 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1970	Secretary	Indefinite Term; Since July 22, 2019	N/A	Assistant Vice President, U.S. Bancorp Fund Services, LLC (2019-present); Partner, Practus, LLP (2018-2019); Counsel, Drinker Biddle & Reath (2016-2018).	N/A
Kelly A. Burns 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1987	Assistant Treasurer	Indefinite Term; Since April 23, 2015	N/A	Assistant Vice President, U.S. Bancorp Fund Services, LLC (2011-present).	N/A
Melissa Aguinaga 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1987	Assistant Treasurer	Indefinite Term; Since July 1, 2015	N/A	Assistant Vice President, U.S. Bancorp Fund Services, LLC (2010-present).	N/A
Laura A. Carroll 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1985	Assistant Treasurer	Indefinite Term; Since August 20, 2018	N/A	Assistant Vice President, U.S. Bancorp Fund Services, LLC (2007-present).	N/A

* Mr. Neuberger is deemed to be an “interested person” of the Trust as defined by the 1940 Act due to his position and material business relationship with the Trust.

Role of the Board

The Board provides oversight of the management and operations of the Trust. The day-to-day responsibility for the management and operation of the Trust is the responsibility of various service providers to the Trust and its individual series, such as the Adviser, the Distributor (defined below), and the Fund’s administrator, custodian, and transfer agent, each of which is discussed in greater detail in this SAI. The Board approves all significant agreements between the Trust and its service providers, including the agreements with the Adviser, the Distributor, and the Fund’s administrator, custodian and transfer agent. The Board has appointed various

individuals of certain of these service providers as officers of the Trust, with responsibility to monitor and report to the Board on the Trust's day-to-day operations. In conducting this oversight, the Board receives regular reports from these officers and service providers regarding the Trust's operations. The Board has appointed a CCO who reports directly to the Board and who administers the Trust's compliance program and regularly reports to the Board as to compliance matters, including an annual compliance review. Some of these reports are provided as part of formal, Board meetings, which are generally held in-person five times per year, and such other times as the Board determines is necessary, and involve the Board's review of recent Trust operations. From time to time one or more members of the Board may also meet with Trust officers in less formal settings, between formal Board meetings to discuss various topics. In all cases, however, the role of the Board and of any individual Trustee is one of oversight and not of management of the day-to-day affairs of the Trust, and its oversight role does not make the Board a guarantor of the Trust's investments, operations or activities.

Board Leadership Structure

The Board has structured itself in a manner that it believes allows it to effectively perform its oversight function. The Board of Trustees is composed of three Independent Trustees – Dr. Michael D. Akers, Mr. Gary A. Drska and Mr. Jonas B. Siegel – and one Trustee who is an “interested person” (as defined by the 1940 Act) of the Trust (the “Interested Trustee”) – Mr. Joseph C. Neuberger. Accordingly, 75% of the members of the Board are Independent Trustees, Trustees who are not affiliated with the Adviser or its affiliates, or any other investment adviser or other service provider to the Trust or any underlying fund. The Board of Trustees has established three standing committees, an Audit Committee, a Nominating Committee and a Valuation Committee, which are discussed in greater detail under “Board Committees” below. Each of the Audit Committee and the Nominating Committee is composed entirely of Independent Trustees. The Independent Trustees have engaged their own independent counsel to advise them on matters relating to their responsibilities in connection with the Trust.

The Trust's Chairperson, Mr. Neuberger, is deemed to be an “interested person” of the Trust, as defined by the 1940 Act, due to his position and material business relationship with the Trust. Mr. Neuberger also serves as President of U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services (“Fund Services”), the Fund's administrator. The Trust has not appointed a lead Independent Trustee.

In accordance with the fund governance standards prescribed under the 1940 Act, the Independent Trustees on the Nominating Committee select and nominate all candidates for Independent Trustee positions. Each Trustee was appointed to serve on the Board of Trustees because of his experience, qualifications, attributes and skills as set forth in the subsection “Trustee Qualifications” below.

The Board reviews its structure regularly in light of the characteristics and circumstances of the Trust, including: the unaffiliated nature of each investment adviser and the fund(s) managed by such adviser; the number of funds that comprise the Trust; the variety of asset classes that those funds reflect; the net assets of the Trust; the committee structure of the Trust; and the independent distribution arrangements of each of the Trust's underlying funds.

The Board has determined that the function and composition of the Audit Committee and the Nominating Committee are appropriate to address any potential conflicts of interest that may arise from the Chairperson's status as an Interested Trustee. In addition, the inclusion of all Independent Trustees as members of the Audit Committee and the Nominating Committee allows all such Trustees to participate in the full range of the Board's oversight duties, including oversight of risk management processes discussed below. Given the specific characteristics and circumstances of the Trust as described above, the Trust has determined that the Board's leadership structure is appropriate.

Board Oversight of Risk Management

As part of its oversight function, the Board receives and reviews various risk management reports and assessments and discusses these matters with appropriate management and other personnel, including personnel of the Trust's service providers. Because risk management is a broad concept composed of many elements (such as, for example, investment risk, issuer and counterparty risk, compliance risk, operational risks, business continuity risks, etc.) the oversight of different types of risks is handled in different ways. For example, the CCO regularly reports to the Board during Board meetings and meets in executive session with the Independent Trustees and their legal counsel to discuss compliance and operational risks. In addition, the Independent Trustee designated as the Audit Committee's "audit committee financial expert" meets with the Treasurer and the Trust's independent registered public accounting firms to discuss, among other things, the internal control structure of the Trust's financial reporting function. The full Board receives reports from the investment advisers to the underlying funds and the portfolio managers as to investment risks as well as other risks that may be discussed during Audit Committee meetings.

Trustee Qualifications

The Board believes that each of the Trustees has the qualifications, experience, attributes and skills appropriate to his continued service as a Trustee of the Trust in light of the Trust's business and structure. The Trustees have substantial business and professional backgrounds that indicate they have the ability to critically review, evaluate and assess information provided to them. Certain of these business and professional experiences are set forth in detail in the table above. In addition, the Trustees have substantial board experience and, in their service to the Trust, have gained substantial insight as to the operation of the Trust. The Board annually conducts a "self-assessment" wherein the effectiveness of the Board and the individual Trustees is reviewed.

In addition to the information provided in the table above, below is certain additional information concerning each individual Trustee. The information provided below, and in the table above, is not all-inclusive. Many of the Trustees' qualifications to serve on the Board involve intangible elements, such as intelligence, integrity, work ethic, the ability to work together, the ability to communicate effectively, the ability to exercise judgment, the ability to ask incisive questions, and commitment to shareholder interests. In conducting its annual self-assessment, the Board has determined that the Trustees have the appropriate attributes and experience to continue to serve effectively as Trustees of the Trust.

Michael D. Akers, Ph.D., CPA. Dr. Akers has served as an Independent Trustee of the Trust since 2001. Dr. Akers has also served as an independent trustee of USA Mutuals, an open-end investment company, since 2001. Dr. Akers has been a Professor Emeritus, Department of Accounting at Marquette University since June 2019, was Professor, Department of Accounting at Marquette University from 2004 to May 2019, was Chair of the Department of Accounting at Marquette University from 2004 to 2017, and was Associate Professor, Department of Accounting at Marquette University from 1996 to 2004. Dr. Akers is a certified public accountant, a certified fraud examiner, a certified internal auditor and a certified management accountant. Through his experience as a trustee of mutual funds and his employment experience, Dr. Akers is experienced with financial, accounting, regulatory and investment matters.

Gary A. Drska. Mr. Drska has served as an Independent Trustee of the Trust since 2001. Mr. Drska has also served as an independent trustee of USA Mutuals since 2001. Mr. Drska has served as a Pilot of Frontier/Midwest Airlines, Inc., an airline company, since 1986. Through his experience as a trustee of mutual funds, Mr. Drska is experienced with financial, accounting, regulatory and investment matters.

Jonas B. Siegel, CPA. Mr. Siegel has served as an Independent Trustee of the Trust since October 2009. Mr. Siegel previously served as an Independent Manager of the Ramius IDF fund complex from 2010 to 2015, which was composed of two closed-end investment companies. Mr. Siegel previously served as an independent trustee of

Gottex Trust, an open-end investment company from 2010 to 2015. Mr. Siegel previously served as a trustee of the Gottex Multi-Asset Endowment fund complex and the Gottex Multi-Alternatives fund complex from 2010 to 2015, each of which was composed of three closed-end investment companies. He also served as the Managing Director, CAO and CCO of Granite Capital International Group, LP, an investment management firm, from 1994 to 2011, as Vice President, Secretary, Treasurer and CCO of Granum Series Trust, an open-end investment company, from 1997 to 2007, and as President, CAO and CCO of Granum Securities, LLC, a broker-dealer, from 1997 to 2007. Mr. Siegel is a certified public accountant. Through his experience as a trustee of mutual funds and his employment experience, Mr. Siegel is experienced with financial, accounting, regulatory and investment matters.

Joseph C. Neuberger. Mr. Neuberger has served as an Interested Trustee of the Trust since 2001. Mr. Neuberger previously served as a trustee of USA Mutuals, an open-end investment company, from 2001 to 2018 and as a trustee of Buffalo Funds, an open-end investment company, from 2003 to 2017. Mr. Neuberger has served as President of Fund Services, a multi-line service provider to mutual funds, since 2017. Mr. Neuberger previously served as Executive Vice President of Fund Services from 1994 to 2017 and as Chief Operating Officer of Fund Services from 2016 to 2020. Through his experience as a trustee of mutual funds and his employment experience, Mr. Neuberger is experienced with financial, accounting, regulatory and investment matters.

Trustee Ownership of Shares

As of the date of this SAI, no Trustee or officer of the Trust beneficially owned shares of the Fund or any other series of the Trust.

Furthermore, as of the date of this SAI, neither the Trustees who are not “interested” persons of the Fund, nor members of their immediate families, owned securities beneficially or of record, in the Adviser, the Distributor or any of their affiliates. Accordingly, neither the Trustees who are not “interested” persons of the Fund nor members of their immediate families, have a direct or indirect interest, the value of which exceeds \$120,000, in the Adviser, the Distributor or any of their affiliates. In addition, during the two most recently completed calendar years, neither the Independent Trustees nor members of their immediate families have had a direct or indirect interest, the value of which exceeds \$120,000 in: (i) the Adviser, the Distributor or any of their affiliates, or (ii) any transaction or relationship in which any such entity, the Fund, any officer of the Fund, or any of their affiliates was a party.

Board Committees

Audit Committee. The Trust has an Audit Committee, which is composed of the Independent Trustees, Dr. Michael D. Akers, Mr. Gary A. Drska and Mr. Jonas B. Siegel. The Audit Committee reviews financial statements and other audit-related matters for the Fund. The Audit Committee also holds discussions with management and with the Fund’s independent auditor concerning the scope of the audit and the auditor’s independence. Dr. Akers is designated as the Audit Committee chairman and serves as the Audit Committee’s “audit committee financial expert,” as stated in the annual reports relating to the series of the Trust. Because the Fund had not commenced operations as of the date of this SAI, the Audit Committee did not meet with respect to the Fund during the past fiscal year.

Nominating Committee. The Trust has a Nominating Committee, which is composed of the Independent Trustees, Dr. Michael D. Akers, Mr. Gary A. Drska and Mr. Jonas B. Siegel. The Nominating Committee is responsible for seeking and reviewing candidates for consideration as nominees for the position of trustee and meets only as necessary. As part of this process, the Nominating Committee considers criteria for selecting candidates sufficient to identify a diverse group of qualified individuals to serve as trustees.

The Nominating Committee will consider nominees recommended by shareholders for vacancies on the Board of Trustees. Recommendations for consideration by the Nominating Committee should be sent to the President of the Trust in writing together with the appropriate biographical information concerning each such proposed nominee, and such recommendation must comply with the notice provisions set forth in the Trust's Nominating Committee charter. In general, to comply with such procedures, such nominations, together with all required information, must be delivered to and received by the President of the Trust at the principal executive office of the Trust not later than 60 days prior to the shareholder meeting at which any such nominee would be voted on. Shareholder recommendations for nominations to the Board of Trustees will be accepted on an ongoing basis and such recommendations will be kept on file for consideration when there is a vacancy on the Board of Trustees. Because the Fund had not commenced operations as of the date of this SAI, the Nominating Committee did not meet with respect to the Fund during the past fiscal year.

Valuation Committee. The Trust has a Valuation Committee. The Valuation Committee is responsible for the following: (1) monitoring the valuation of Fund securities and other investments; and (2) as required, when the Board of Trustees is not in session, determining the fair value of illiquid securities and other holdings after consideration of all relevant factors, which determinations are reported to the Board. The Valuation Committee is currently composed of Mr. John Buckel, Ms. Jennifer Lima, Ms. Kelly Burns and Ms. Melissa Aguinaga, who each serve as officers of the Trust. The Valuation Committee meets as necessary when a price for a portfolio security is not readily available. Because the Fund had not commenced operations as of the date of this SAI, the Valuation Committee did not meet with respect to the Fund during the past fiscal year.

Trustee Compensation

For their service as Trustees, the Independent Trustees receive from the Trust a retainer fee of \$52,250 per year, \$4,000 for each regular Board meeting attended and \$1,000 for each special Board meeting attended telephonically, as well as reimbursement for expenses incurred in connection with attendance at Board meetings. Members of the Audit Committee receive \$1,750 for each meeting of the Audit Committee attended. The chairman of the Audit Committee receives an annual retainer of \$2,500. Interested Trustees do not receive any compensation for their service as Trustee. The following table shows the compensation expected to be earned by each Trustee during the current fiscal year ending December 31, 2021:

Name of Person/ Position	Aggregate Compensation From the Fund ⁽¹⁾	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from the Fund and the Trust ⁽²⁾ Paid to Trustees
Dr. Michael D. Akers, Independent Trustee ⁽³⁾⁽⁴⁾	\$545	None	None	\$85,250
Gary A. Drska, Independent Trustee ⁽³⁾	\$545	None	None	\$82,750
Jonas B. Siegel Independent Trustee ⁽³⁾	\$545	None	None	\$82,750
Joseph C. Neuberger, Interested Trustee	None	None	None	None

⁽¹⁾ Trustees' fees and expenses are allocated among the Fund and the other series comprising the Trust.

⁽²⁾ There are currently twenty-one other series comprising the Trust.

⁽³⁾ Audit Committee member.

⁽⁴⁾ Audit Committee chairman.

Principal Shareholders, Control Persons, and Management Ownership

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding Shares. A control person is a shareholder that owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledges the existence of control. Shareholders owning voting securities in excess of 25% may determine the outcome of any matter affecting and voted on by shareholders of the Fund. As of the date of this SAI, there were no outstanding Shares of the Fund.

Investment Adviser

Investment advisory services are provided to the Fund by Mairs and Power, Inc., W1520 First National Bank Building, 332 Minnesota Street, Saint Paul, Minnesota 55101-1363, pursuant to an investment advisory agreement (the "Advisory Agreement") between the Trust, on behalf of the Fund, and the Adviser. The Adviser is an employee-owned firm, with no one individual owning 25% or more of the Adviser's voting securities. Subject to such policies as the Board of Trustees may determine, the Adviser is ultimately responsible for investment decisions for the Fund. Pursuant to the terms of the Advisory Agreement, the Adviser provides the Fund with such investment advice and supervision as it deems necessary for the proper supervision of the Fund's investments.

The Advisory Agreement will continue in effect for an initial period of two years. Thereafter, the Advisory Agreement will be renewable from year to year, only if such continuance is specifically approved at least annually by: (i) the Board of Trustees or the vote of a majority of the Fund's outstanding voting securities; and (ii) the vote of a majority of the Trustees of the Trust who are not parties to the Advisory Agreement nor interested persons thereof, cast in-person at a meeting called for the purpose of voting on such approval. The Advisory Agreement is terminable without penalty by the Trust, on behalf of the Fund, upon 60 days' written notice to the Adviser when authorized by either: (i) a majority vote of the outstanding voting securities of the Fund; or (ii) by a vote of a majority of the Board of Trustees, or by the Adviser upon 60 days' written notice to the Trust. The Advisory Agreement will automatically terminate in the event of its "assignment" (as defined under the 1940 Act). The Advisory Agreement provides that the Adviser under such agreement shall not be liable for any error of judgment or mistake of law or for any loss arising out of any investment or for any act or omission in the execution of portfolio transactions for the Fund, except for willful misfeasance, bad faith or negligence in the performance of its duties, or by reason of reckless disregard of its obligations and duties thereunder.

In consideration of the services provided by the Adviser pursuant to the Advisory Agreement, the Adviser is entitled to receive from the Fund a unified management fee, which is calculated daily and paid monthly, at an annual rate equal to 0.39% of the Fund's average daily net assets, as specified in the Prospectus. However, the Adviser may voluntarily agree to waive a portion of the management fees payable to it on a month-to-month basis, including additional fees above and beyond any contractual agreement the Adviser may have to waive management fees and/or reimburse Fund expenses.

Pursuant to the Advisory Agreement, the Adviser has agreed to pay all expenses of the Fund except interest charges on any borrowings, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act, and the unified management fee payable to the Adviser.

The Fund is new and has not paid management fees to the Adviser as of the date of this SAI.

Portfolio Managers

As disclosed in the Prospectus, Brent S. Miller, CFA[®] and Robert W. Thompson, CFA[®], CIC (each, a “Portfolio Manager” and collectively, the “Portfolio Managers”) are the portfolio managers for the Fund and are primarily responsible for the day-to-day management of the Fund’s portfolio.

Other Accounts Managed by the Portfolio Managers

The table below identifies, for each Portfolio Manager of the Fund, the number of accounts managed (excluding the Fund) and the total assets in such accounts, within each of the following categories: registered investment companies, other pooled investment vehicles, and other accounts. To the extent that any of these accounts are subject to an advisory fee which is based on account performance, this information is reflected in a separate table below. Asset amounts have been rounded as of January 31, 2021:

Category of Account	Total Number of Accounts Managed	Total Assets in Accounts Managed	Number of Accounts for which Advisory Fee is Based on Performance	Assets in Accounts for which Advisory Fee is Based on Performance
<i>Brent S. Miller</i>				
Registered Investment Companies	0	\$0	0	\$0
Other Pooled Investment Vehicles	0	\$0	0	\$0
Other Accounts	0	\$0	0	\$0
<i>Robert W. Thompson</i>				
Registered Investment Companies	0	\$0	0	\$0
Other Pooled Investment Vehicles	1	\$882 million	0	\$0
Other Accounts	81	\$797 million	0	\$0

Portfolio Manager Compensation

The Fund does not pay any salary, bonus, deferred compensation, pension or retirement plan contributions on behalf of the portfolio managers or any other employee of the Adviser. The portfolio managers of the Fund receive compensation from the Adviser. Compensation consists of a fixed salary and bonuses based on the profitability of the Adviser. The portfolio managers also participate in the profit sharing plan of the Adviser. Contributions are made annually and are within the limitations of the Internal Revenue Service (“IRS”) rules and regulations.

Material Conflicts of Interest

The Adviser has adopted policies and procedures that address conflicts of interest that may arise between a portfolio manager’s management of the Fund and their management of other accounts. Potential areas of conflict could involve allocation of investment opportunities and trades between the Fund and other accounts, use of information regarding the timing of the Fund’s trades, personal investing activities, and a portfolio manager’s compensation structure. The Adviser has adopted policies and procedures that it believes are reasonably designed to address these conflicts. However, there is no guarantee that such policies and procedures will be effective or that the Adviser will anticipate all potential conflicts of interest.

Ownership of Securities in the Fund by the Portfolio Managers

As of the date of this SAI, the Portfolio Managers did not beneficially own Shares.

Service Providers

Fund Administrator, Transfer Agent and Fund Accountant

Pursuant to a fund administration servicing agreement (the “Administration Agreement”) between the Trust and Fund Services, 615 East Michigan Street, Milwaukee, Wisconsin, 53202, Fund Services acts as the Fund’s administrator. Fund Services provides certain administrative services to the Fund, including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Fund’s independent contractors and agents; preparing for signature by an officer of the Trust all of the documents required to be filed for compliance by the Trust and the Fund with applicable laws and regulations excluding those of the securities laws of various states; arranging for the computation of performance data, including NAV and yield; responding to shareholder inquiries; and arranging for the maintenance of books and records of the Fund, and providing, at its own expense, office facilities, equipment and personnel necessary to carry out its duties. In this capacity, Fund Services does not have any responsibility or authority for the management of the Fund, the determination of investment policy, or for any matter pertaining to the distribution of Shares.

Pursuant to the Administration Agreement, as compensation for its services, Fund Services receives from the Adviser a combined fee for fund administration and fund accounting services based on the Fund’s current average daily net assets. Fund Services is also entitled to be reimbursed for certain out-of-pocket expenses. In addition to its role as administrator, Fund Services also acts as fund accountant, transfer agent (“Transfer Agent”) and dividend disbursing agent under separate agreements with the Trust.

The Fund is new and the Administrator has not received any fees for administrative services to the Fund as of the date of this SAI.

Custodian

U.S. Bank National Association, an affiliate of Fund Services (the “Custodian”), serves as the custodian of the Fund’s assets pursuant to a custody agreement between the Custodian and the Trust on behalf of the Fund, whereby the Custodian charges fees on a transactional basis plus out-of-pocket expenses. The Custodian has custody of all assets and securities of the Fund, delivers and receives payments for securities sold, receives and pays for securities purchased, collects income from investments and performs other duties, all as directed by the officers of the Trust. The Custodian’s address is 1555 North River Center Drive, Suite 302, Milwaukee, Wisconsin 53212. The Custodian does not participate in decisions relating to the purchase and sale of securities by the Fund.

Legal Counsel

Godfrey & Kahn, S.C., 833 East Michigan Street, Suite 1800, Milwaukee, Wisconsin 53202, serves as legal counsel to the Fund and the Independent Trustees.

Independent Registered Public Accounting Firm

Cohen & Company, Ltd. (“Cohen”), 1350 Euclid Avenue, Suite 800, Cleveland, Ohio, 44115, serves as the independent registered public accounting firm of the Fund. Cohen audits and reports on the Fund’s annual financial statements, reviews certain regulatory reports and the Fund’s federal income tax returns, and performs other auditing and tax services for the Fund when engaged to do so.

Distribution and Servicing of Shares

The Trust has entered into a distribution agreement (the “Distribution Agreement”) with Foreside Fund Services, LLC (the “Distributor”), located at Three Canal Plaza, Suite 100, Portland, Maine 04101, pursuant to which the Distributor acts as the Fund’s principal underwriter, provides certain administration services and promotes and arranges for the sale of the Fund’s shares. The offering of the Fund’s shares is continuous, and the Distributor distributes the Fund’s shares on a best efforts basis. The Distributor is not obligated to sell any certain number of shares of the Fund. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. (“FINRA”).

The Distribution Agreement will continue for two years from its effective date and is renewable annually thereafter. The continuance of the Distribution Agreement must be specifically approved at least annually by the Board of Trustees or by vote of a majority of the Fund’s outstanding voting securities and, in either case, by a majority of the Trustees who are not parties to the Distribution Agreement or “interested persons” (as defined in the 1940 Act) of any such party. The Distribution Agreement is terminable without penalty by the Trust on behalf of the Fund on 60 days’ written notice when authorized either by a majority vote of the outstanding voting securities of the Fund or by vote of a majority of the Trustees who are not “interested persons” (as defined in the 1940 Act). The Distribution Agreement is terminable without penalty by the Distributor upon 60 days’ written notice to the Trust. The Distribution Agreement will automatically terminate in the event of its “assignment” (as defined in the 1940 Act) or by the Distributor on 60 days’ written notice.

Portfolio Transactions and Brokerage

Pursuant to the Advisory Agreement, the Adviser determines which securities are to be purchased and sold by the Fund and which broker-dealers are eligible to execute the Fund’s portfolio transactions. Purchases and sales of securities in the over-the-counter market will generally be executed directly with a “market-maker” unless, in the opinion of the Adviser, a better price and execution can otherwise be obtained by using a broker for the transaction.

Purchases of portfolio securities for the Fund will be effected through broker-dealers (including banks) that specialize in the types of securities that the Fund will be holding, unless the Adviser believes that better executions are available elsewhere. Dealers usually act as principal for their own accounts. Purchases from dealers will include a spread between the bid and the asked price. If the execution and price offered by more than one dealer are comparable, the order may be allocated to a dealer that has provided research or other services as discussed below.

In placing portfolio transactions, the Adviser will use reasonable efforts to choose broker-dealers capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the firm involved, the firm’s risk in positioning a block of securities and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers that furnish or supply research and statistical information to the Adviser that it may lawfully and appropriately use in its investment advisory capacities, as well as provide other brokerage services in addition to execution services. The Adviser considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Advisory Agreement with the Fund, to be useful in varying degrees, but of indeterminable value. Portfolio transactions may be placed with broker-dealers who sell shares of the Fund subject to rules adopted by FINRA and the SEC. Portfolio transactions may also be placed with broker-dealers in which the Adviser has invested on behalf of the Fund and/or client accounts.

While it is the Fund's general policy to first seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Fund, weight is also given to the ability of a broker-dealer to furnish brokerage and research services to the Fund or to the Adviser, even if the specific services are not directly useful to the Fund and may be useful to the Adviser in advising other clients. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, the Fund may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Adviser to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer. The standard of reasonableness is to be measured in light of the Adviser's overall responsibilities to the Fund.

Investment decisions for the Fund are made independently from those of other client accounts. Nevertheless, it is possible that at times identical securities will be acceptable for both the Fund and one or more of such client accounts. In such event, the position of the Fund and such client account(s) in the same issuer may vary and the length of time that each may choose to hold its investment in the same issuer may likewise vary. However, to the extent any of these client accounts seek to acquire the same security as the Fund at the same time, the Fund may not be able to acquire as large a portion of such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, the Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time. If one or more of such client accounts simultaneously purchases or sells the same security that the Fund is purchasing or selling, each day's transactions in such security will be allocated between the Fund and all such client accounts in a manner deemed equitable by the Adviser, taking into account the respective sizes of the accounts and the amount being purchased or sold. It is recognized that in some cases this system could have a detrimental effect on the price or value of the security insofar as the Fund is concerned. In other cases, however, it is believed that the ability of the Fund to participate in volume transactions may produce better executions for the Fund. Notwithstanding the above, the Adviser may execute buy and sell orders for accounts and take action in performance of its duties with respect to any of its accounts that may differ from actions taken with respect to another account, so long as the Adviser shall, to the extent practicable, allocate investment opportunities to accounts, including the Fund, over a period of time on a fair and equitable basis and in accordance with applicable law.

Brokers or dealers selected to execute the Fund's portfolio transactions may include the Fund's Authorized Participants or their affiliates. An Authorized Participant or its affiliates may be selected to execute the Fund's portfolio transactions in conjunction with an all-cash creation unit order or an order including "cash-in-lieu". As described below under "Purchase and Redemption of Shares in Creation Units—Creation Transaction Fee" and "—Redemption Transaction Fee," the Fund may determine to not charge a variable fee on certain orders when the Adviser has determined that doing so is in the best interests of Fund shareholders, even if the decision to not charge a variable fee could be viewed as benefiting the Authorized Participant or its affiliate selected to execute the Fund's portfolio transactions in connection with such orders.

Brokerage Commissions

The Fund is new and had not paid any brokerage commissions as of the date of this SAI.

Securities of “Regular Broker-Dealers”

The Fund is required to identify any securities of its “regular brokers and dealers” (as such term is defined in the 1940 Act) that it may hold at the close of its most recent fiscal year. “Regular brokers or dealers” of the Fund are the ten brokers or dealers that, during the most recent fiscal year: (i) received the greatest dollar amounts of brokerage commissions from the Fund’s portfolio transactions; (ii) engaged as principal in the largest dollar amounts of portfolio transactions of the Fund; or (iii) sold the largest dollar amounts of the Shares. Because the Fund is new, as of the date of this SAI, the Fund does not hold any securities of “regular broker-dealers.”

Portfolio Turnover

Although the Fund generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Adviser, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (1) the lesser of purchases or sales of portfolio securities for the fiscal year by (2) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in the Fund’s portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to above-average transaction and brokerage commission costs and may generate capital gains, including short-term capital gains taxable to shareholders at ordinary income rates. To the extent that the Fund experiences an increase in brokerage commissions due to a higher portfolio turnover rate, the performance of the Fund could be negatively impacted by the increased expenses incurred by the Fund. Furthermore, a high portfolio turnover rate may result in a greater number of taxable transactions.

Code of Ethics

The Trust and the Adviser have each adopted a Code of Ethics under Rule 17j-1 of the 1940 Act. These Codes of Ethics permit, subject to certain conditions, personnel of the Adviser to invest in securities that may be purchased or held by the Fund. The Distributor relies on the exception for principal underwriters under Rule 17j-1(c)(3) from the requirement to adopt a code of ethics pursuant to Rule 17j-1 because the Distributor is not affiliated with the Trust or the Adviser, and no officer, director, or general partner of the Distributor serves as an officer or director of the Trust or the Adviser.

Proxy-Voting Procedures

The Board of Trustees has adopted Proxy Voting Policies and Procedures (the “Proxy Policies”) on behalf of the Trust which delegate the responsibility for voting proxies to the Adviser, subject to the continuing oversight of the Board of Trustees. The Proxy Voting Policies of the Adviser are described below. The Proxy Policies require that the Adviser vote proxies received in a manner consistent with the best interests of the Fund and its shareholders.

In the event of a conflict between the interests of the Adviser and the Fund, the Proxy Policies provide that the conflict may be disclosed to the Board of Trustees or its delegate, who shall provide direction on how to vote the proxy. The Board of Trustees has delegated this authority to the Independent Trustees, and the proxy voting direction in such a case shall be determined by a majority of the Independent Trustees.

The Adviser’s Proxy Voting Guidelines

Under the Adviser’s Proxy Voting Policies & Procedures, attached as Appendix A, the Fund’s policy is to vote in accordance with guidelines established by the Adviser’s Investment Committee, which are subject to change. The Investment Committee, comprised of the Adviser’s investment managers, is responsible for resolving voting decisions that cannot be readily determined by reference to the proxy voting guidelines.

The actual proxy voting records relating to portfolio securities during the most recent 12-month period ended June 30 will be available as soon as reasonably practicable after filing the report with the SEC without charge, by visiting the Fund's website at www.mairsandpower.com or by accessing the SEC's website at www.sec.gov.

Portfolio Holdings Information

The Trust's Board of Trustees has adopted a policy regarding the disclosure of information about the Fund's security holdings. The Fund's entire portfolio holdings are publicly disseminated each day the Fund is open for business and may be available through financial reporting and news services, including publicly available internet web sites. In addition, the composition of the Deposit Securities is publicly disseminated daily prior to the opening of the Exchange via the facilities of the National Securities Clearing Corporation ("NSCC").

Determination of Net Asset Value

The NAV of the Fund's shares will fluctuate and is determined as of the close of trading on the New York Stock Exchange ("NYSE") (generally 4:00 p.m., Eastern time) each business day. The NYSE annually announces the days on which it will not be open for trading. The most recent announcement indicates that the NYSE will not be open on the following days: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. However, the NYSE may close on days not included in that announcement. If the NYSE closes early, the Funds will calculate the NAV as of the close of trading on the NYSE on that day. If an emergency exists as permitted by the SEC, the NAV may be calculated at a different time.

The NAV per share is computed by dividing the value of the securities held by the Fund plus any cash or other assets (including interest and dividends accrued but not yet received) minus all liabilities (including accrued expenses) by the total number of shares in the Fund outstanding at such time.

$$\frac{\text{Net Assets}}{\text{Shares Outstanding}} = \text{Net Asset Value Per Share}$$

Generally, the Fund's investments are valued at market value or, in the absence of a market value, at fair value as determined in good faith by the Adviser and the Valuation Committee pursuant to procedures approved by or under the direction of the Board of Trustees.

Each equity security owned by the Fund, including depositary receipts, that is traded on a national securities exchange, except for securities listed on the NASDAQ Stock Market LLC ("NASDAQ"), is valued at its last sale price on the exchange on which such security is traded, as of the close of business on the day the security is being valued or, lacking any reported sales, at the mean between the most recent bid and asked price. All equity securities that are not traded on a listed exchange are valued at the last sales price at the close of the OTC market. If a non-exchange listed security does not trade on a particular day, then the mean between the last quoted bid and asked price will be used as long as it continues to reflect the value of the security.

Securities that are traded on more than one exchange are valued using the price of the exchange that the Fund generally considers to be the principal exchange on which the security is traded. Fund securities listed on NASDAQ shall be valued using the NASDAQ Official Closing Price, which may not necessarily represent the last sales price. If there has been no sale on such exchange or on NASDAQ on such day, the security will be valued at the mean between the most recent quoted bid and asked prices at the close of the exchange on such day, or the security shall be valued at the latest sales price on the "composite market" for the day such security is being valued. The composite market is defined as a consolidation of the trade information provided by a national securities and foreign exchange and OTC markets as published by an approved independent pricing service ("Pricing Service").

Money market funds, demand notes and repurchase agreements are valued at cost. If cost does not represent current market value the securities will be priced at fair value.

Debt securities, including short-term debt instruments having a maturity of 60 days or less, are valued at the mean in accordance with prices provided by a Pricing Service. Pricing Services may use various valuation methodologies such as the mean between the bid and the asked prices, matrix pricing method or other analytical pricing models as well as market transactions and dealer quotations. If a price is not available from a Pricing Service, the most recent quotation obtained from one or more broker-dealers known to follow the issue will be obtained. Quotations will be valued at the mean between the bid and the offer. Fixed income securities purchased on a delayed-delivery basis are typically marked to market daily until settlement at the forward settlement date. Any discount or premium is accreted or amortized using the constant yield 2 method until maturity.

Exchange traded options are valued at the composite price, using the National Best Bid and Offer quotes (“NBBO”). NBBO consists of the highest bid price and lowest ask price across any of the exchanges on which an option is quoted, thus providing a view across the entire U.S. options marketplace. Specifically, composite pricing looks at the last trades on the exchanges where the options are traded. If there are no trades for the option on a given business day composite option pricing calculates the mean of the highest bid price and lowest ask price across the exchanges where the option is traded.

All other assets of the Fund are valued in such manner as the Board of Trustees in good faith deems appropriate to reflect their fair value.

Purchase and Redemption of Shares in Creation Units

The Trust issues and sells Shares only in Creation Units on a continuous basis through the Distributor, without a sales load (but subject to transaction fees, if applicable), at their NAV per share next determined after receipt of an order, on any Business Day, in proper form pursuant to the terms of the Authorized Participant Agreement (“Participant Agreement”). The NAV of Shares is calculated each business day as of the scheduled close of regular trading on the NYSE, generally 4:00 p.m., Eastern Time. The Fund will not issue fractional Creation Units. A “Business Day” is any day on which the NYSE is open for business.

Fund Deposit. The consideration for purchase of a Creation Unit of the Fund generally consists of the in-kind deposit of the Deposit Securities and the Cash Component, computed as described below. Notwithstanding the foregoing, the Trust reserves the right to permit or require the substitution of a “cash in lieu” amount (“Deposit Cash”) to be added to the Cash Component to replace any or all of the Deposit Securities. When accepting purchases of Creation Units for all or a portion of Deposit Cash, the Fund may incur additional costs associated with the acquisition of Deposit Securities that would otherwise be provided by an in-kind purchaser. Pursuant to Rule 6c-11 of the 1940 Act, the Fund may utilize baskets that are not representative of the Fund’s portfolio referred to as custom baskets.

Together, the Deposit Securities or Deposit Cash, as applicable, and the Cash Component constitute the “Fund Deposit,” which represents the minimum initial and subsequent investment amount for a Creation Unit of the Fund. The “Cash Component” is an amount equal to the difference between the NAV of Shares (per Creation Unit) and the value of the Deposit Securities or Deposit Cash, as applicable. If the Cash Component is a positive number (*i.e.*, the NAV per Creation Unit exceeds the value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component shall be such positive amount. If the Cash Component is a negative number (*i.e.*, the NAV per Creation Unit is less than the value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component shall be such negative amount and the creator will be entitled to receive cash in an amount equal to the Cash Component. The Cash Component serves the function of compensating for any differences

between the NAV per Creation Unit and the value of the Deposit Securities or Deposit Cash, as applicable. Computation of the Cash Component excludes any stamp duty or other similar fees and expenses payable upon transfer of beneficial ownership of the Deposit Securities, if applicable, which shall be the sole responsibility of the Authorized Participant (as defined below).

The Fund, through NSCC, makes available on each Business Day, prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time), the list of the names and the required number of Shares of each Deposit Security or the required amount of Deposit Cash, as applicable, to be included in the current Fund Deposit (based on information at the end of the previous Business Day) for the Fund. Such Fund Deposit is subject to any applicable adjustments as described below, to effect purchases of Creation Units of the Fund until such time as the next-announced composition of the Deposit Securities or the required amount of Deposit Cash, as applicable, is made available.

The identity and number of Shares of the Deposit Securities or the amount of Deposit Cash, as applicable, required for the Fund Deposit for the Fund changes from time to time.

Procedures for Purchase of Creation Units. To be eligible to place orders with the Transfer Agent to purchase a Creation Unit of the Fund, an entity must be (i) a “Participating Party” (*i.e.*, a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC (the “Clearing Process”), a clearing agency that is registered with the SEC; or (ii) a DTC Participant (see “Book Entry Only System”). In addition, each Participating Party or DTC Participant (each, an “Authorized Participant”) must execute a Participant Agreement that has been agreed to by the Distributor, and that has been accepted by the Transfer Agent, with respect to purchases and redemptions of Creation Units. Each Authorized Participant will agree, pursuant to the terms of a Participant Agreement, on behalf of itself or any investor on whose behalf it will act, to certain conditions, including that it will pay to the Trust, an amount of cash sufficient to pay the Cash Component together with the creation transaction fee (described below), if applicable, and any other applicable fees and taxes.

All orders to purchase Shares directly from the Fund must be placed for one or more Creation Units and in the manner and by the time set forth in the Participant Agreement and/or applicable order form. With respect to the Fund, the order cut-off time for orders to purchase Creation Units is 3:00 p.m. Eastern time, which time may be modified by the Fund from time-to-time by amendment to the Participant Agreement and/or applicable order form. The date on which an order to purchase Creation Units (or an order to redeem Creation Units, as set forth below) is received and accepted is referred to as the “Order Placement Date.”

An Authorized Participant may require an investor to make certain representations or enter into agreements with respect to the order (*e.g.*, to provide for payments of cash, when required). Investors should be aware that their particular broker may not have executed a Participant Agreement and that, therefore, orders to purchase Shares directly from the Fund in Creation Units must be placed by the investor’s broker through an Authorized Participant that has executed a Participant Agreement. In such cases there may be additional charges to such investor. At any given time, there may be only a limited number of broker-dealers that have executed a Participant Agreement and only a small number of such Authorized Participants may have international capabilities.

On days when the Exchange closes earlier than normal, the Fund may require orders to create Creation Units to be placed earlier in the day. In addition, if a market or markets on which the Fund’s investments are primarily traded is closed, the Fund will also generally not accept orders on such day(s). Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Transfer Agent pursuant to procedures set forth in the Participant Agreement and in accordance with the applicable order form. On behalf of the Fund, the Transfer Agent will notify the Custodian of such order. The Custodian will then provide such information to the appropriate local sub-custodian(s). Those placing orders through an Authorized Participant

should allow sufficient time to permit proper submission of the purchase order to the Transfer Agent by the cut-off time on such Business Day. Economic or market disruptions or changes, or telephone or other communication failure may impede the ability to reach the Distributor or an Authorized Participant.

Fund Deposits must be delivered by an Authorized Participant through the Federal Reserve System (for cash) or through DTC (for corporate securities), through a sub-custody agent (for foreign securities) and/or through such other arrangements allowed by the Trust or its agents. With respect to foreign Deposit Securities, the Custodian shall cause the sub-custodian of the Fund to maintain an account into which the Authorized Participant shall deliver, on behalf of itself or the party on whose behalf it is acting, such Deposit Securities (or Deposit Cash for all or a part of such securities, as permitted or required), with any appropriate adjustments as advised by the Trust. Foreign Deposit Securities must be delivered to an account maintained at the applicable local sub-custodian. A Fund Deposit transfer must be ordered by the Authorized Participant in a timely fashion to ensure the delivery of the requisite number of Deposit Securities or Deposit Cash, as applicable, to the account of the Fund or its agents by no later than 12:00 p.m. Eastern Time (or such other time as specified by the Trust) on the Settlement Date. If the Fund or its agents do not receive all of the Deposit Securities, or the required Deposit Cash in lieu thereof, by such time, then the order may be deemed rejected and the Authorized Participant shall be liable to the Fund for losses, if any, resulting therefrom. The "Settlement Date" for the Fund is generally the second Business Day after the Order Placement Date. All questions as to the number of Deposit Securities or Deposit Cash to be delivered, as applicable, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities or cash, as applicable, will be determined by the Trust, whose determination shall be final and binding. The amount of cash represented by the Cash Component must be transferred directly to the Custodian through the Federal Reserve Bank wire transfer system in a timely manner to be received by the Custodian no later than the Settlement Date. If the Cash Component and the Deposit Securities or Deposit Cash, as applicable, are not received by the Custodian in a timely manner by the Settlement Date, the creation order may be cancelled. Upon written notice to the Transfer Agent, such canceled order may be resubmitted the following Business Day using a Fund Deposit as newly constituted to reflect the then current NAV of the Fund.

The order shall be deemed to be received on the Business Day on which the order is placed provided that the order is placed in proper form prior to the applicable cut-off time and the federal funds in the appropriate amount are deposited with the Custodian on the Settlement Date. If the order is not placed in proper form as required, or federal funds in the appropriate amount are not received on the Settlement Date, then the order may be deemed to be rejected and the Authorized Participant shall be liable to the Fund for losses, if any, resulting therefrom. A creation request is in "proper form" if all procedures set forth in the Participant Agreement, order form and this SAI are properly followed.

Issuance of a Creation Unit. Except as provided in this SAI, Creation Units will not be issued until the transfer of good title to the Trust of the Deposit Securities or payment of Deposit Cash, as applicable, and the payment of the Cash Component have been completed. When the sub-custodian has confirmed to the Custodian that the required Deposit Securities (or the cash value thereof) have been delivered to the account of the relevant sub-custodian or sub-custodians, the Transfer Agent and the Adviser shall be notified of such delivery, and the Trust will issue and cause the delivery of the Creation Units. The delivery of Creation Units so created generally will occur no later than the second Business Day following the day on which the purchase order is deemed received by the Transfer Agent. The Authorized Participant shall be liable to the Fund for losses, if any, resulting from unsettled orders.

Creation Units may be purchased in advance of receipt by the Trust of all or a portion of the applicable Deposit Securities as described below. In these circumstances, the initial deposit will have a value greater than the NAV of the Shares on the date the order is placed in proper form since, in addition to available Deposit Securities, cash must be deposited in an amount equal to the sum of (i) the Cash Component, plus (ii) an additional amount of

cash equal to a percentage of the value as set forth in the Participant Agreement, of the undelivered Deposit Securities (the “Additional Cash Deposit”), which shall be maintained in a separate non-interest bearing collateral account. The Authorized Participant must deposit with the Custodian the Additional Cash Deposit, as applicable, by 12:00 p.m. Eastern Time (or such other time as specified by the Trust) on the Settlement Date. If the Fund or its agents do not receive the Additional Cash Deposit in the appropriate amount, by such time, then the order may be deemed rejected and the Authorized Participant shall be liable to the Fund for losses, if any, resulting therefrom. An additional amount of cash shall be required to be deposited with the Trust, pending delivery of the missing Deposit Securities to the extent necessary to maintain the Additional Cash Deposit with the Trust in an amount at least equal to the applicable percentage, as set forth in the Participant Agreement, of the daily market value of the missing Deposit Securities. The Participant Agreement will permit the Trust to buy the missing Deposit Securities at any time. Authorized Participants will be liable to the Trust for the costs incurred by the Trust in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Securities exceeds the value of such Deposit Securities on the day the purchase order was deemed received by the Transfer Agent plus the brokerage and related transaction costs associated with such purchases. The Trust will return any unused portion of the Additional Cash Deposit once all of the missing Deposit Securities have been properly received by the Custodian or purchased by the Trust and deposited into the Trust. In addition, a transaction fee, as described below under “Creation Transaction Fee,” may be charged. The delivery of Creation Units so created generally will occur no later than the Settlement Date.

Acceptance of Orders of Creation Units. The Trust reserves the absolute right to reject an order for Creation Units transmitted to it by the Transfer Agent with respect to the Fund including, without limitation, if (a) the order is not in proper form; (b) the Deposit Securities or Deposit Cash, as applicable, delivered by the Participant are not as disseminated through the facilities of the NSCC for that date by the Custodian; (c) the investor(s), upon obtaining Shares ordered, would own 80% or more of the currently outstanding Shares of the Fund; (d) acceptance of the Deposit Securities would have certain adverse tax consequences to the Fund; (e) the acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; (f) the acceptance of the Fund Deposit would otherwise, in the discretion of the Trust or the Adviser, have an adverse effect on the Trust or the rights of beneficial owners; (g) the acceptance or receipt of the order for a Creation Unit would, in the opinion of counsel to the Trust, be unlawful; or (h) in the event that circumstances outside the control of the Trust, the Custodian, the Transfer Agent and/or the Adviser make it for all practical purposes not feasible to process orders for Creation Units.

Examples of such circumstances include acts of God or public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Trust, the Distributor, the Custodian, a sub-custodian, the Transfer Agent, DTC, NSCC, Federal Reserve System, or any other participant in the creation process, and other extraordinary events. The Transfer Agent shall notify a prospective creator of a Creation Unit and/or the Authorized Participant acting on behalf of the creator of a Creation Unit of its rejection of the order of such person. The Trust, the Transfer Agent, the Custodian, any sub-custodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits nor shall either of them incur any liability for the failure to give any such notification. The Trust, the Transfer Agent, the Custodian and the Distributor shall not be liable for the rejection of any purchase order for Creation Units.

All questions as to the number of Shares of each security in the Deposit Securities and the validity form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust, and the Trust’s determination shall be final and binding.

Creation Transaction Fee. A fixed purchase (*i.e.*, creation) transaction fee, payable to the Fund’s custodian, may be imposed for the transfer and other transaction costs associated with the purchase of Creation Units (“Creation Order Costs”). The standard fixed creation transaction fee for the Fund is \$250, regardless of the number of Creation Units created in the transaction. The Fund may adjust the standard fixed creation transaction fee from time to time. The fixed creation fee may be waived on certain orders if the Fund’s custodian has determined to waive some or all of the Creation Order Costs associated with the order or another party, such as the Adviser, has agreed to pay such fee.

In addition, a variable fee, payable to the Fund, of up to a maximum percentage of 2% of the value of the Creation Units subject to the transaction may be imposed for cash purchases, non-standard orders, or partial cash purchases of Creation Units. For orders comprised entirely of cash, a variable fee of 0.03% of the value of the order will be charged by the Fund. The variable charge is primarily designed to cover additional costs (*e.g.*, brokerage, taxes) involved with buying the securities with cash. The Fund may determine to not charge a variable fee on certain orders when the Adviser has determined that doing so is in the best interests of Fund shareholders, *e.g.*, for creation orders that facilitate the rebalance of the Fund’s portfolio in a more tax efficient manner than could be achieved without such order.

Investors who use the services of a broker or other such intermediary may be charged a fee for such services. Investors are responsible for the fixed costs of transferring the Fund Securities from the Fund to their account or on their order.

Risks of Purchasing Creation Units. There are certain legal risks unique to investors purchasing Creation Units directly from the Fund. Because Shares may be issued on an ongoing basis, a “distribution” of Shares could be occurring at any time. Certain activities that a shareholder performs as a dealer could, depending on the circumstances, result in the shareholder being deemed a participant in the distribution in a manner that could render the shareholder a statutory underwriter and subject to the prospectus delivery and liability provisions of the Securities Act. For example, a shareholder could be deemed a statutory underwriter if it purchases Creation Units from the Fund, breaks them down into the constituent Shares, and sells those Shares directly to customers, or if a shareholder chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary-market demand for Shares. Whether a person is an underwriter depends upon all of the facts and circumstances pertaining to that person’s activities, and the examples mentioned here should not be considered a complete description of all the activities that could cause you to be deemed an underwriter.

Dealers who are not “underwriters” but are participating in a distribution (as opposed to engaging in ordinary secondary-market transactions), and thus dealing with Shares as part of an “unsold allotment” within the meaning of Section 4(a)(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act.

Redemption. Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by the Fund through the Transfer Agent and only on a Business Day. EXCEPT UPON LIQUIDATION OF THE FUND, THE TRUST WILL NOT REDEEM SHARES IN AMOUNTS LESS THAN CREATION UNITS. Investors must accumulate enough Shares in the secondary market to constitute a Creation Unit to have such Shares redeemed by the Trust. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Investors should expect to incur brokerage and other costs in connection with assembling a sufficient number of Shares to constitute a redeemable Creation Unit.

With respect to the Fund, the Custodian, through the NSCC, makes available prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time) on each Business Day, the list of the names and Share quantities

of the Fund's portfolio securities that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as defined below) on that day ("Fund Securities"). Fund Securities received on redemption may not be identical to Deposit Securities.

Redemption proceeds for a Creation Unit are paid either in-kind or in cash, or combination thereof, as determined by the Trust. With respect to in-kind redemptions of the Fund, redemption proceeds for a Creation Unit will consist of Fund Securities—as announced by the Custodian on the Business Day of the request for redemption received in proper form plus cash in an amount equal to the difference between the NAV of Shares being redeemed, as next determined after a receipt of a request in proper form, and the value of the Fund Securities (the "Cash Redemption Amount"), less a fixed redemption transaction fee, as applicable, as set forth below. If the Fund Securities have a value greater than the NAV of Shares, a compensating cash payment equal to the differential is required to be made by or through an Authorized Participant by the redeeming shareholder. Notwithstanding the foregoing, at the Trust's discretion, an Authorized Participant may receive the corresponding cash value of the securities in lieu of the in-kind securities value representing one or more Fund Securities.

Redemption Transaction Fee. A fixed redemption transaction fee, payable to the Fund's custodian, may be imposed for the transfer and other transaction costs associated with the redemption of Creation Units ("Redemption Order Costs"). The standard fixed redemption transaction fee for the Fund is \$250, regardless of the number of Creation Units redeemed in the transaction. The Fund may adjust the redemption transaction fee from time to time. The fixed redemption fee may be waived on certain orders if the Fund's custodian has determined to waive some or all of the Redemption Order Costs associated with the order or another party, such as the Adviser, has agreed to pay such fee.

In addition, a variable fee, payable to the Fund, of up to a maximum percentage of 2% of the value of the Creation Units subject to the transaction may be imposed for cash redemptions, non-standard orders, or partial cash redemptions (when cash redemptions are available) of Creation Units. The variable charge is primarily designed to cover additional costs (*e.g.*, brokerage, taxes) involved with selling portfolio securities to satisfy a cash redemption. For orders comprised entirely of cash, a variable fee of 0.25% of the value of the order will be charged by the Fund. The Fund may determine to not charge a variable fee on certain orders when the Adviser has determined that doing so is in the best interests of Fund shareholders, *e.g.*, for redemption orders that facilitate the rebalance of the Fund's portfolio in a more tax efficient manner than could be achieved without such order.

Investors who use the services of a broker or other such intermediary may be charged a fee for such services. Investors are responsible for the fixed costs of transferring the Fund Securities from the Fund to their account or on their order.

Procedures for Redemption of Creation Units. Orders to redeem Creation Units of the Fund must be submitted in proper form to the Transfer Agent prior to 3:00 p.m. Eastern time. A redemption request is considered to be in "proper form" if (i) an Authorized Participant has transferred or caused to be transferred to the Trust's Transfer Agent the Creation Unit(s) being redeemed through the book-entry system of DTC so as to be effective by the time as set forth in the Participant Agreement and (ii) a request in form satisfactory to the Trust is received by the Transfer Agent from the Authorized Participant on behalf of itself or another redeeming investor within the time periods specified in the Participant Agreement. If the Transfer Agent does not receive the investor's Shares through DTC's facilities by the times and pursuant to the other terms and conditions set forth in the Participant Agreement, the redemption request shall be rejected.

The Authorized Participant must transmit the request for redemption, in the form required by the Trust, to the Transfer Agent in accordance with procedures set forth in the Authorized Participant Agreement. Investors

should be aware that their particular broker may not have executed an Authorized Participant Agreement, and that, therefore, requests to redeem Creation Units may have to be placed by the investor's broker through an Authorized Participant who has executed an Authorized Participant Agreement. Investors making a redemption request should be aware that such request must be in the form specified by such Authorized Participant. Investors making a request to redeem Creation Units should allow sufficient time to permit proper submission of the request by an Authorized Participant and transfer of the Shares to the Trust's Transfer Agent; such investors should allow for the additional time that may be required to effect redemptions through their banks, brokers or other financial intermediaries if such intermediaries are not Authorized Participants.

Additional Redemption Procedures. In connection with taking delivery of Shares of Fund Securities upon redemption of Creation Units, a redeeming shareholder or Authorized Participant acting on behalf of such shareholder must maintain appropriate custody arrangements with a qualified broker-dealer, bank, or other custody providers in each jurisdiction in which any of the Fund Securities are customarily traded, to which account such Fund Securities will be delivered. Deliveries of redemption proceeds generally will generally be made within two business days of the trade date.

The Trust may in its discretion exercise its option to redeem such Shares in cash, and the redeeming investor will be required to receive its redemption proceeds in cash. In addition, an investor may request a redemption in cash that the Fund may, in its sole discretion, permit. In either case, the investor will receive a cash payment equal to the NAV of its Shares based on the NAV of Shares of the Fund next determined after the redemption request is received in proper form (minus a redemption transaction fee, if applicable, and additional charge for requested cash redemptions specified above, to offset the Trust's brokerage and other transaction costs associated with the disposition of Fund Securities). The Fund may also, in its sole discretion, upon request of a shareholder, provide such redeemer a portfolio of securities that differs from the exact composition of the Fund Securities but does not differ in NAV.

Redemptions of Shares for Fund Securities will be subject to compliance with applicable federal and state securities laws and the Fund (whether or not it otherwise permits cash redemptions) reserve the right to redeem Creation Units for cash to the extent that the Trust could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities under such laws. An Authorized Participant or an investor for which it is acting subject to a legal restriction with respect to a particular security included in the Fund Securities applicable to the redemption of Creation Units may be paid an equivalent amount of cash. The Authorized Participant may request the redeeming investor of the Shares to complete an order form or to enter into agreements with respect to such matters as compensating cash payment. Further, an Authorized Participant that is not a "qualified institutional buyer," ("QIB") as such term is defined under Rule 144A of the Securities Act, will not be able to receive Fund Securities that are restricted securities eligible for resale under Rule 144A. An Authorized Participant may be required by the Trust to provide a written confirmation with respect to QIB status to receive Fund Securities.

Because the portfolio securities of the Fund may trade on other exchanges on days that the Exchange is closed or are otherwise not Business Days for the Fund, shareholders may not be able to redeem their Shares, or to purchase or sell Shares on the Exchange, on days when the NAV of the Fund could be significantly affected by events in the relevant foreign markets.

The right of redemption may be suspended or the date of payment postponed with respect to the Fund (1) for any period during which the Exchange is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the Exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of Shares or determination of the NAV of the Shares is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

Federal Income Tax Matters

This section is not intended to be a full discussion of federal income tax laws and the effect of such laws on you.

The following is only a summary of certain U.S. federal income tax considerations generally affecting the Fund and its shareholders that supplements the discussion in the Prospectus. No attempt is made to present a comprehensive explanation of the federal, state, local or foreign tax treatment of the Fund or its shareholders, and the discussion here and in the Prospectus is not intended to be a substitute for careful tax planning.

The following general discussion of certain U.S. federal income tax consequences is based on provisions of the Code and the regulations issued thereunder as in effect on the date of this SAI. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

The tax legislation commonly referred to as the Tax Cuts and Jobs Act (the “Tax Act”) made significant changes to the U.S. federal income tax rules for taxation of individuals and corporations, generally effective for taxable years beginning after December 31, 2017. Many of the changes applicable to individuals are temporary and would apply only to taxable years beginning after December 31, 2017 and before January 1, 2026. There are only minor changes with respect to the specific rules applicable to RICs, such as the Fund. The Tax Act, however, made numerous other changes to the tax rules that may affect shareholders and the Fund. You are urged to consult with your own tax advisor regarding how the Tax Act affects your investment in the Fund.

Shareholders are urged to consult their own tax advisors regarding the application of the provisions of tax law described in this SAI in light of the particular tax situations of the shareholders and regarding specific questions as to federal, state, foreign or local taxes.

Taxation of the Fund. The Fund intends to invest substantially all of its assets in qualifying municipal debt obligations, the interest on which is generally exempt from the regular federal income tax, the federal AMT and Minnesota state income tax. For the Fund to pay tax-exempt distributions for any taxable year, at least 50% of the aggregate value of its assets at the close of each quarter of its taxable year must consist of municipal obligations that qualify under Section 103(a) of the Code. All or a portion of a tax-exempt distribution declared by the Fund may consist of income attributable to certain private activity bonds which are treated as preference items and must be taken into account in calculating a non-corporate shareholder’s alternative minimum tax. Tax-exempt distributions may also be subject to state or local income taxes, other than income attributable to those obligations specifically exempt from Minnesota state income tax.

The Fund will elect and intends to qualify each year to be treated as a RIC under the Code. As such, the Fund should not be subject to federal income taxes on its net investment income and capital gains, if any, to the extent that it timely distributes such income and capital gains to its shareholders. Generally, to qualify for treatment as a RIC, the Fund must distribute in each taxable year at least 90% of its “investment company taxable income” for the taxable year, which includes, among other items, dividends, interest, net short-term capital gain and net foreign currency gain, less expenses, as well as 90% of its net tax-exempt interest income, if any (the “Distribution Requirement”) and must meet several additional requirements. Among these requirements are the following: (i) at least 90% of the Fund’s gross income each taxable year must be derived from dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, or other income derived with respect to its business of investing in such stock, securities or foreign currencies and net income derived from interests in qualified publicly traded partnerships (the “Qualifying Income Requirement”); and (ii) at the end of each quarter of the Fund’s taxable year, the Fund’s assets must be diversified so that (a) at least 50% of the value of the Fund’s total assets is represented by cash and cash items,

U.S. government securities, securities of other RICs, and other securities, with such other securities limited, in respect to any one issuer, to an amount not greater in value than 5% of the value of the Fund's total assets and to not more than 10% of the outstanding voting securities of such issuer, including the equity securities of a qualified publicly traded partnership, and (b) not more than 25% of the value of its total assets is invested in the securities (other than U.S. government securities or securities of other RICs) of any one issuer, the securities (other than securities of other RICs) of two or more issuers which the Fund controls and which are engaged in the same, similar, or related trades or businesses, or the securities of one or more qualified publicly traded partnerships (the "Diversification Requirement").

To the extent the Fund makes investments that may generate income that is not qualifying income, including certain derivatives, the Fund will seek to restrict the resulting income from such investments so that the Fund's non-qualifying income does not exceed 10% of its gross income.

Although the Fund intends to distribute substantially all of its net investment income and may distribute its capital gains for any taxable year, the Fund will be subject to federal income taxation to the extent any such income or gains are not distributed. The Fund is treated as a separate corporation for federal income tax purposes. The Fund therefore is considered a separate entity in determining its treatment under the rules for RICs described herein. The requirements (other than certain organizational requirements) for qualifying RIC status are determined at the Fund level rather than at the Trust level.

If the Fund fails to satisfy the Qualifying Income Requirement or the Diversification Requirement in any taxable year, the Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain de minimis failures of the Diversification Requirement where the Fund corrects the failure within a specified period of time. To be eligible for the relief provisions with respect to a failure to meet the Diversification Requirement, the Fund may be required to dispose of certain assets. If these relief provisions were not available to the Fund and it were to fail to qualify for treatment as a RIC for a taxable year, all of its taxable income would be subject to tax at regular corporate rates without any deduction for distributions to shareholders, and its distributions (including capital gains distributions) generally would be taxable to the shareholders of the Fund as ordinary income dividends, subject to the dividends received deduction for corporate shareholders and the lower tax rates on qualified dividend income received by non-corporate shareholders, subject to certain limitations. To requalify for treatment as a RIC in a subsequent taxable year, the Fund would be required to satisfy the RIC qualification requirements for that year and to distribute any earnings and profits from any year in which the Fund failed to qualify for tax treatment as a RIC. If the Fund failed to qualify as a RIC for a period greater than two taxable years, it would generally be required to pay the Fund-level tax on certain net built in gains recognized with respect to certain of its assets upon a disposition of such assets within five years of qualifying as a RIC in a subsequent year. The Board reserves the right not to maintain the qualification of the Fund for treatment as a RIC if it determines such course of action to be beneficial to shareholders. If the Fund determines that it will not qualify as a RIC, the Fund will establish procedures to reflect the anticipated tax liability in the Fund's NAV.

The Fund may elect to treat part or all of any "qualified late year loss" as if it had been incurred in the succeeding taxable year in determining the Fund's taxable income, net capital gain, net short-term capital gain, and earnings and profits. The effect of this election is to treat any such "qualified late year loss" as if it had been incurred in the succeeding taxable year in characterizing Fund distributions for any calendar year. A "qualified late year loss" generally includes net capital loss, net long-term capital loss, or net short-term capital loss incurred after October 31 of the current taxable year, subject to special rules in the event the Fund makes an election under Section 4982(e)(4) of the Code (commonly referred to as "post-October losses") and certain other late-year losses.

Capital losses in excess of capital gains (“net capital losses”) are not permitted to be deducted against a RIC’s net investment income. Instead, for U.S. federal income tax purposes, potentially subject to certain limitations, the Fund may carry a net capital loss from any taxable year forward indefinitely to offset its capital gains, if any, in years following the year of the loss. To the extent subsequent capital gains are offset by such losses, they will not result in U.S. federal income tax liability to the Fund and may not be distributed as capital gains to its shareholders. Generally, the Fund may not carry forward any losses other than net capital losses. The carryover of capital losses may be limited under the general loss limitation rules if the Fund experiences an ownership change as defined in the Code.

The Fund will be subject to a nondeductible 4% federal excise tax on certain undistributed income if it does not distribute to its shareholders in each calendar year an amount at least equal to 98% of its ordinary income for the calendar year plus 98.2% of its capital gain net income for either the one-year period ending on October 31 of that year, or if the Fund makes an election under Section 4982(e)(4) of the Code, the Fund’s fiscal year, subject to an increase for any shortfall in the prior year’s distribution. The Fund intends to declare and distribute dividends and distributions in the amounts and at the times necessary to avoid the application of the excise tax, but can make no assurances that all such tax liability will be eliminated.

If the Fund meets the Distribution Requirement but retains some or all of its income or gains, it will be subject to federal income tax at regular corporate rates to the extent any such income or gains are not distributed. The Fund may elect to designate certain amounts retained as undistributed net capital gain as deemed distributions in a notice to its shareholders, who (i) will be required to include in income for U.S. federal income tax purposes, as long-term capital gain, their proportionate shares of the undistributed amount so designated, (ii) will be entitled to credit their proportionate shares of the income tax paid by the Fund on that undistributed amount against their federal income tax liabilities and to claim refunds to the extent such credits exceed their tax liabilities, and (iii) will be entitled to increase their tax basis, for federal income tax purposes, in their Shares by an amount equal to the excess of the amount of undistributed net capital gain included in their respective income over their respective income tax credits.

Taxation of Shareholders – Distributions. The Fund intends to distribute annually to its shareholders substantially all of its investment company taxable income (computed without regard to the deduction for dividends paid), its net tax-exempt income, if any, and any net capital gain (net recognized long-term capital gains in excess of net recognized short-term capital losses, taking into account any capital loss carryforwards). The distribution of investment company taxable income (as so computed) and net realized capital gain will be taxable to Fund shareholders regardless of whether the shareholder receives these distributions in cash or reinvests them in additional Shares.

The Fund (or your broker) will report to shareholders annually the amounts of dividends paid from ordinary income, the amount of distributions of net capital gain, the portion of dividends which may qualify for the dividends received deduction for corporate shareholders, and the portion of dividends which may qualify for treatment as qualified dividend income, which is taxable to non-corporate shareholders at long-term capital gain rates.

Distributions from the Fund’s net capital gain will be taxable to shareholders at long-term capital gains rates, regardless of how long shareholders have held their Shares.

Qualified dividend income includes, in general, subject to certain holding period and other requirements, dividend income from taxable domestic corporations and certain “qualified foreign corporations.” Subject to certain limitations, “qualified foreign corporations” include those incorporated in possessions of the United States, those incorporated in certain countries with comprehensive tax treaties with the United States, and other foreign

corporations if the stock with respect to which the dividends are paid is readily tradable on an established securities market in the United States. Dividends received by the Fund from an ETF or an underlying fund taxable as a RIC or a REIT may be treated as qualified dividend income generally only to the extent so reported by such ETF, underlying fund or REIT. If 95% or more of the Fund's gross income (calculated without taking into account net capital gain derived from sales or other dispositions of stock or securities) consists of qualified dividend income, the Fund may report all distributions of such income as qualified dividend income.

Fund dividends will not be treated as qualified dividend income if the Fund does not meet holding period and other requirements with respect to dividend paying stocks in its portfolio, or the shareholder does not meet holding period and other requirements with respect to the Shares on which the dividends were paid. Distributions by the Fund of its net short-term capital gains will be taxable as ordinary income. Distributions from the Fund's net capital gain will be taxable to shareholders at long-term capital gains rates, regardless of how long shareholders have held their Shares. Distributions may be subject to state and local taxes.

In the case of corporate shareholders, certain dividends received by the Fund from U.S. corporations (generally, dividends received by the Fund in respect of any share of stock (1) with a tax holding period of at least 46 days during the 91-day period beginning on the date that is 45 days before the date on which the stock becomes ex-dividend as to that dividend and (2) that is held in an unleveraged position) and distributed and appropriately so reported by the Fund may be eligible for the 50% dividends-received deduction. Certain preferred stock must have a holding period of at least 91 days during the 181-day period beginning on the date that is 90 days before the date on which the stock becomes ex-dividend as to that dividend to be eligible. Capital gain dividends distributed to the Fund from other RICs are not eligible for the dividends-received deduction. To qualify for the deduction, corporate shareholders must meet the minimum holding period requirement stated above with respect to their Shares, taking into account any holding period reductions from certain hedging or other transactions or positions that diminish their risk of loss with respect to their Shares, and, if they borrow to acquire or otherwise incur debt attributable to Shares, they may be denied a portion of the dividends-received deduction with respect to those Shares.

Although dividends generally will be treated as distributed when paid, any dividend declared by the Fund in October, November or December and payable to shareholders of record in such a month that is paid during the following January will be treated for U.S. federal income tax purposes as received by shareholders on December 31 of the calendar year in which it was declared.

In addition to the federal income tax, certain individuals, trusts and estates may be subject to a Net Investment Income ("NII") tax of 3.8%. The NII tax is imposed on the lesser of: (i) a taxpayer's investment income, net of deductions properly allocable to such income; or (ii) the amount by which such taxpayer's modified adjusted gross income exceeds certain thresholds (\$250,000 for married individuals filing jointly, \$200,000 for unmarried individuals and \$125,000 for married individuals filing separately). The Fund's distributions are includable in a shareholder's investment income for purposes of this NII tax. In addition, any capital gain realized by a shareholder upon a sale, exchange or redemption of Fund shares is includable in such shareholder's investment income for purposes of this NII tax.

Shareholders who have not held Shares for a full year should be aware that the Fund may report and distribute, as ordinary dividends or capital gain dividends, a percentage of income that is not equal to the percentage of the Fund's ordinary income or net capital gain, respectively, actually earned during the applicable shareholder's period of investment in the Fund. A taxable shareholder may wish to avoid investing in the Fund shortly before a dividend or other distribution, because the distribution will generally be taxable even though it may economically represent a return of a portion of the shareholder's investment.

To the extent that the Fund makes a distribution of income received by the Fund in lieu of dividends (a “substitute payment”) with respect to securities on loan pursuant to a securities lending transaction, such income will not constitute qualified dividend income to individual shareholders and will not be eligible for the dividends received deduction for corporate shareholders.

If the Fund’s distributions exceed its earnings and profits, all or a portion of the distributions made for a taxable year may be recharacterized as a return of capital to shareholders. A return of capital distribution will generally not be taxable, but will reduce each shareholder’s cost basis in the Fund and result in a higher capital gain or lower capital loss when the Shares on which the distribution was received are sold. After a shareholder’s basis in the Shares has been reduced to zero, distributions in excess of earnings and profits will be treated as gain from the sale of the shareholder’s Shares.

Taxation of Shareholders – Sale of Shares. A sale, redemption, or exchange of Shares may give rise to a gain or loss. In general, any gain or loss realized upon a taxable disposition of Shares will be treated as long-term capital gain or loss if Shares have been held for more than 12 months. Otherwise, the gain or loss on the taxable disposition of Shares will generally be treated as short-term capital gain or loss. Any loss realized upon a taxable disposition of Shares held for six months or less will be treated as long-term capital loss, rather than short-term capital loss, to the extent of any amounts treated as distributions to the shareholder of long-term capital gain with respect to such Shares (including any amounts credited to the shareholder as undistributed capital gains). All or a portion of any loss realized upon a taxable disposition of Shares may be disallowed if substantially identical Shares are acquired (through the reinvestment of dividends or otherwise) within a 61-day period beginning 30 days before and ending 30 days after the disposition. In such a case, the basis of the newly acquired Shares will be adjusted to reflect the disallowed loss.

The cost basis of Shares acquired by purchase will generally be based on the amount paid for Shares and then may be subsequently adjusted for other applicable transactions as required by the Code. The difference between the selling price and the cost basis of Shares generally determines the amount of the capital gain or loss realized on the sale or exchange of Shares. Contact the broker through whom you purchased your Shares to obtain information with respect to the available cost basis reporting methods and elections for your account.

An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and the sum of the exchanger’s aggregate basis in the securities surrendered plus the amount of cash paid for such Creation Units. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the exchanger’s basis in the Creation Units and the sum of the aggregate market value of any securities received plus the amount of any cash received for such Creation Units. The IRS, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot currently be deducted, under the rules governing “wash sales” (for a person who does not mark-to-market its portfolio) or, on the basis that there has been no significant change in economic position.

Any capital gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if the securities exchanged for such Creation Units have been held for more than one year. Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if Shares comprising the Creation Units have been held for more than one year. Otherwise, such capital gains or losses will generally be treated as short-term capital gains or losses. Any loss upon a redemption of Creation Units held for six months or less may be treated as long-term capital loss to the extent of any amounts treated as distributions to the applicable Authorized Participant of long-term capital gain with respect to the Creation Units (including any amounts credited to the Authorized Participant as undistributed capital gains).

The Trust, on behalf of the Fund, has the right to reject an order for Creation Units if the purchaser (or a group of purchasers) would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding Shares and if, pursuant to Section 351 of the Code, the Fund would have a basis in the deposit securities different from the market value of such securities on the date of deposit. The Trust also has the right to require the provision of information necessary to determine beneficial Share ownership for purposes of the 80% determination. If the Fund does issue Creation Units to a purchaser (or a group of purchasers) that would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding Shares, the purchaser (or a group of purchasers) will not recognize gain or loss upon the exchange of securities for Creation Units.

Persons purchasing or redeeming Creation Units should consult their own tax advisers with respect to the tax treatment of any creation or redemption transaction and whether the wash sales rule applies and when a loss may be deductible.

Minnesota Income Taxation. The following discussion relates only to Minnesota income taxation and is a general summary of the Minnesota tax law in effect as of the date of this SAI. Shareholders should consult their own tax advisors regarding their particular tax circumstances.

Minnesota taxable net income is based generally on federal taxable income.

Exempt-interest dividends paid by the Fund and derived from interest income on tax-exempt obligations of Minnesota, its political or governmental subdivisions, municipalities, governmental agencies or instrumentalities or a tribal government of an Indian tribe located in Minnesota (“Minnesota Sources”) will be exempt from the regular Minnesota personal income tax imposed on individuals, estates and trusts, provided that at least 95% of the exempt-interest dividends paid by the Fund in a taxable year are derived from Minnesota Sources. Furthermore, exempt-interest dividends, if any, derived from interest on certain obligations issued by U.S. territories and possessions also will be exempt from the regular Minnesota personal income tax (although exempt-interest dividends paid from interest on obligations of U.S. territories and possessions are not considered to be derived from Minnesota Sources for purposes of satisfying the 95% test). Other dividends paid by the Fund, including other exempt-interest dividends paid from sources other than Minnesota Sources, and distributions derived from net short-term and long-term capital gains, are not exempt from the regular Minnesota personal income tax imposed on individuals, estates, and trusts. Exempt-interest dividends attributable to interest on certain private activity bonds issued after August 7, 1986, will be included in Minnesota alternative minimum taxable income of individuals, estates and trusts for purposes of computing Minnesota’s alternative minimum tax. Exempt-interest dividends from the Fund are not excluded from the Minnesota taxable income of corporations and financial institutions, and generally will not qualify for the dividends-received deduction.

Any distributions of capital gains earned by the Fund are included in an individual shareholder’s Minnesota taxable income.

Backup Withholding. The Fund will be required in certain cases to withhold (as “backup withholding”) on amounts payable to any shareholder who (1) fails to provide a correct taxpayer identification number certified under penalty of perjury; (2) is subject to backup withholding by the IRS for failure to properly report all payments of interest or dividends; (3) fails to provide a certified statement that he or she is not subject to “backup withholding”; or (4) fails to provide a certified statement that he or she is a U.S. person (including a U.S. resident alien). The backup withholding rate is at a rate set under Section 3406 of the Code. Backup withholding is not an additional tax and any amounts withheld may be credited against the shareholder’s ultimate U.S. federal income tax liability. Backup withholding will not be applied to payments that have been subject to the 30% withholding tax on shareholders who are neither citizens nor permanent residents of the U.S.

Non-U.S. Shareholders. Any non-U.S. investors in the Fund may be subject to U.S. withholding and estate tax and are encouraged to consult their tax advisors prior to investing in the Fund. Foreign shareholders (*i.e.*, nonresident alien individuals and foreign corporations, partnerships, trusts and estates) are generally subject to U.S. withholding tax at the rate of 30% (or a lower tax treaty rate) on distributions derived from taxable ordinary income. The Fund may, under certain circumstances, report all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the U.S. for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax. Gains realized by foreign shareholders from the sale or other disposition of Shares generally are not subject to U.S. taxation, unless the recipient is an individual who is physically present in the U.S. for 183 days or more per year (based on a formula that factors in presence in the U.S. during the two preceding years as well) . Foreign shareholders who fail to provide an applicable IRS form may be subject to backup withholding on certain payments from the Fund. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described in this paragraph. Different tax consequences may result if the foreign shareholder is engaged in a trade or business within the United States. In addition, the tax consequences to a foreign shareholder entitled to claim the benefits of a tax treaty may be different than those described above.

Under the Foreign Account Tax Compliance Act (“FATCA”), the Fund may be required to withhold a generally nonrefundable 30% tax on (i) distributions of investment company taxable income and (ii) distributions of net capital gain and the gross proceeds of a sale or redemption of Fund shares paid to (A) certain “foreign financial institutions” unless such foreign financial institution agrees to verify, monitor, and report to the IRS the identity of certain of its accountholders, among other items (or unless such entity is otherwise deemed compliant under the terms of an intergovernmental agreement between the United States and the foreign financial institution’s country of residence), and (B) certain “non-financial foreign entities” unless such entity certifies to the Fund that it does not have any substantial U.S. owners or provides the name, address, and taxpayer identification number of each substantial U.S. owner, among other items. In December 2018, the IRS and Treasury Department released proposed Treasury Regulations that would eliminate FATCA withholding on Fund distributions of net capital gain and the gross proceeds from a sale or redemption of Fund shares. Although taxpayers are entitled to rely on these proposed Treasury Regulations until final Treasury Regulations are issued, these proposed Treasury Regulations have not been finalized, may not be finalized in their proposed form, and are potentially subject to change. This FATCA withholding tax could also affect the Fund’s return on its investments in foreign securities or affect a shareholder’s return if the shareholder holds its Fund shares through a foreign intermediary. You are urged to consult your tax adviser regarding the application of this FATCA withholding tax to your investment in the Fund and the potential certification, compliance, due diligence, reporting, and withholding obligations to which you may become subject in order to avoid this withholding tax.

For foreign shareholders to qualify for an exemption from backup withholding, described above, the foreign shareholder must comply with special certification and filing requirements. Foreign shareholders in the Fund should consult their tax advisors in this regard.

Tax-Exempt Shareholders. Certain tax-exempt shareholders, including qualified pension plans, individual retirement accounts, salary deferral arrangements, 401(k) plans, and other tax-exempt entities, generally are exempt from federal income taxation except with respect to their unrelated business taxable income (“UBTI”). Under the Tax Act, tax-exempt entities are not permitted to offset losses from one unrelated trade or business against the income or gain of another unrelated trade or business. Certain net losses incurred prior to January 1, 2018 are permitted to offset gain and income created by an unrelated trade or business, if otherwise available. Under current law, the Fund generally serves to block UBTI from being realized by its tax-exempt shareholders with respect to their shares of Fund income. However, notwithstanding the foregoing, tax-exempt shareholders

could realize UBTI by virtue of their investment in the Fund if, for example, (i) the Fund invests in residual interests of Real Estate Mortgage Investment Conduits (“REMICs”), (ii) the Fund invests in a REIT that is a taxable mortgage pool (“TMP”) or that has a subsidiary that is a TMP or that invests in the residual interest of a REMIC, or (iii) Shares constitute debt-financed property in the hands of the tax-exempt shareholders within the meaning of section 514(b) of the Code. Charitable remainder trusts are subject to special rules and should consult their tax advisers. The IRS has issued guidance with respect to these issues and prospective shareholders, especially charitable remainder trusts, are strongly encouraged to consult with their tax advisers regarding these issues.

Certain Potential Tax Reporting Requirements. Under U.S. Treasury regulations, if a shareholder recognizes a loss on disposition of Shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder (or certain greater amounts over a combination of years), the shareholder must file with the IRS a disclosure statement on IRS Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. Significant penalties may be imposed for the failure to comply with the reporting requirements. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer’s treatment of the loss is proper. Shareholders should consult their tax advisers to determine the applicability of these regulations in light of their individual circumstances.

Other Issues. In those states which have income tax laws, the tax treatment of the Fund and of Fund shareholders with respect to distributions by the Fund may differ from federal tax treatment.

Distributions

The following information supplements and should be read in conjunction with the section in the Prospectus entitled “Dividends, Distributions and Taxes.”

General Policies. Dividends from net investment income, if any, are declared and paid at least annually by the Fund. Distributions of net realized securities gains, if any, generally are declared and paid once a year, but the Fund may make distributions on a more frequent basis to comply with the distribution requirements of the Code, in all events in a manner consistent with the provisions of the 1940 Act.

Dividends and other distributions on Shares are distributed, as described below, on a pro rata basis to Beneficial Owners of such Shares. Dividend payments are made through DTC Participants and Indirect Participants to Beneficial Owners then of record with proceeds received from the Trust.

The Fund makes additional distributions to the extent necessary (i) to distribute the entire annual taxable income of the Fund, plus any net capital gains and (ii) to avoid imposition of the excise tax imposed by Section 4982 of the Code. Management of the Trust reserves the right to declare special dividends if, in its reasonable discretion, such action is necessary or advisable to preserve the Fund’s eligibility for treatment as a RIC or to avoid imposition of income or excise taxes on undistributed income.

Dividend Reinvestment Service. The Trust will not make the DTC book-entry dividend reinvestment service available for use by Beneficial Owners for reinvestment of their cash proceeds, but certain individual broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by Beneficial Owners of the Fund through DTC Participants for reinvestment of their dividend distributions. Investors should contact their brokers to ascertain the availability and description of these services. Beneficial Owners should be aware that each broker may require investors to adhere to specific procedures and timetables to participate in the dividend reinvestment service and investors should ascertain from their brokers such necessary details. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in

additional whole Shares issued by the Trust of the applicable Fund at NAV per Share. Distributions reinvested in additional Shares will nevertheless be taxable to Beneficial Owners acquiring such additional Shares to the same extent as if such distributions had been received in cash.

Financial Statements

Because the Fund has recently commenced operations, there are no financial highlights available at this time.

APPENDIX A - Proxy Voting Policies and Procedures

PROXY VOTING POLICY

As a fiduciary, Mairs & Power, Inc. (“M&P”) exercises its responsibility to vote its clients’ securities in a manner that, in the judgment of M&P, is in the clients’ economic best interests. In accordance with that fiduciary obligation and Rule 206(4)-6 under the Investment Advisers Act of 1940, as amended, M&P has established the following proxy policy to ensure proxies are voted in accordance with the best interest of the clients of M&P, including Mairs & Power Funds Trust (the “Trust”). In addition to SEC requirements governing advisers, our proxy voting policies reflect the fiduciary standards and responsibilities for ERISA accounts set out by the Department of Labor, specifically the duty of loyalty, prudence, compliance with the ERISA plan, as well as a duty to avoid prohibited transactions.

The interests represented by M&P with respect to proxy voting for its clients (collectively, the “Clients”), are:

- The interests of M&P’s investment advisory clients for which it has accepted proxy voting discretion and is not expressly precluded from voting within the advisory agreement, and
- The interests of the shareholders of the Trust’s various mutual fund series (the “Funds”). The Board of Trustees of the Trust has delegated responsibility for proxy voting decisions to M&P, the Funds’ investment adviser.

M&P will accept direction on certain policy issues as requested by a particular Client on a case-by-case basis. For ERISA clients, this direction will be accepted provided that said direction is in accordance with the proxy voting guidelines specified within the clients’ Qualified Plan documents.

I. Responsibility for Voting

M&P will vote proxies solicited by or with respect to the issuers of securities in which assets of a Client portfolio are invested, unless: 1.) The advisory agreement between M&P and the Client expressly precludes the voting of proxies by M&P; or 2.) M&P has determined, in its own judgment, that the cost or disadvantages of voting the proxy would exceed the anticipated benefit to the Client.

II. Proxy Voting Team

M&P has delegated its administrative duties with respect to analysis and voting proxies to the Proxy Voting Team, which is currently comprised of individuals representing investment management and trading. The Proxy Voting Team’s duties consist of analyzing proxy statements of issuers whose stock is owned by Clients. Unless otherwise directed by the Client, the Proxy Voting Team seeks to vote all proxies in the best interests of the Client in terms of the perceived effect of the vote on the value of the client’s investment and does not consider any benefit to M&P or its employees. At their discretion, the Proxy Voting Team will seek input on a proxy proposal as necessary from others within the organization, including the M&P Investment Committee and/or the security’s responsible investment manager. The Proxy Voting Team will vote proxies in accordance with the Proxy Voting Guidelines.

III. Proxy Voting Guidelines

One of the primary factors M&P considers when determining the desirability of investing in a particular company is the quality and depth of that company's management. Accordingly, the recommendation of management on any issue is a factor that M&P considers in determining how proxies should be voted. However, M&P does not consider recommendations from management to be determinative of M&P's ultimate decision. As a matter of practice, the votes with respect to most issues are cast in accordance with the position of the company's management. Each issue, however, is considered on its own merits, and M&P will not support the position of a company's management in any situation where it determines that the ratification of management's position would adversely affect the investment merits of owning that company's shares.

M&P has adopted general guidelines for voting proxies as summarized below. In keeping with its fiduciary obligations to its clients, M&P reviews all proposals, even those that may be considered to be routine matters. Although these guidelines are to be followed as a general policy, in all cases each proxy and proposal will be considered based on the relevant facts and circumstances. M&P may deviate from the general policies and procedures when it determines that the particular facts and circumstances warrant such deviation to protect the interests of the Client. These guidelines cannot provide an exhaustive list of all the issues that may arise nor can M&P anticipate all future situations. Corporate governance issues are diverse and continually evolving and M&P devotes significant time and resources to monitor these changes.

a. **Board of Directors**

The board of directors is vital to good corporate governance. Directors are expected to be competent individuals and they should be accountable and responsible to shareholders. M&P seeks to ensure that the board of directors of a company is sufficiently aligned with shareholders' interests and provides proper oversight of the company's management. M&P will generally vote with management on board member elections. Certain elections may be examined on a case-by-case basis; however, will generally vote against any proposal to declassify the board structure of a publicly-held company.

b. **Auditors**

M&P believes that the relationship between a public company and its auditors should be limited primarily to the audit engagement, and it usually will vote in favor of proposals to prohibit or limit fees paid to auditors for any services other than auditing and closely related activities that do not raise any appearance of impaired independence.

c. **Equity Based Compensation Plans**

M&P believes that appropriately designed plans approved by a company's shareholders can be an effective way to align the interests of long-term shareholders and the interests of management, employees and directors. M&P will generally approve new employee incentive plans or amendments to existing plans involving the issuance of new common shares representing less than 10% of the then number of common shares outstanding. All other proposals will be considered on a case-by-case basis.

d. **Corporate and Shareholder Rights**

M&P believes that all shareholders of a company should have an equal voice and that barriers that limit the ability of shareholders to effect corporate change and to realize the full value of their investment are not desirable. M&P will consider proposals related to corporate and shareholder rights on a case-by-case basis, including proposals for supermajority voting rights, anti-takeover measures, and different classes of stock with different voting rights.

e. **Mergers, Acquisitions, Reincorporation and Other Transactions**

Companies ask their shareholders to vote on an enormous variety of different types of transactions, including mergers, acquisitions, reincorporations and reorganizations involving business combinations, liquidations and the sale of all or substantially all of the company's assets. Voting on such proposals involved considerations unique to each transaction. Therefore, M&P will vote on proposals to effect these types of transactions on a case-by-case basis.

f. **Social Responsibility Issues**

M&P believes that matters related to a company's day-to-day business operations are primarily the responsibility of management. All matters regarding social responsibility issues will be assessed on a case-by-case basis based on our assessment of the best interests of our clients and shareholders.

IV. Conflicts of Interest

There may be instances where our interests conflict, or appear to conflict with client interests. For example, we may manage a pension plan for a company whose management is soliciting proxies. There may be a concern that we would vote in favor of management because of our relationship with the company. Or, for example, we (or our staff) may have business or personal relationships with corporate directors or candidates for directorship.

Our duty is to vote proxies in the best interests of our clients and Fund shareholders. Due to the size and nature of M&P's business, it is anticipated that material conflicts of interest will rarely occur. Whenever a material conflict of interest does exist, it will be addressed in one of the following ways:

- a. The proxy will be voted according to the predetermined voting policy set forth herein if the application of the policy to the matter presented involves little discretion on our part;
- b. The proxy will be voted following consultation with the M&P Investment Committee;
- c. The proxy will be voted following consultation with a proxy voting service, legal counsel or other third party, as appropriate;
- d. The proxy will be referred to the Client or to a fiduciary of the Client for voting purposes; or
- e. The conflict will be disclosed to the Client or, with respect to a Fund, the Funds' Independent Trustees and obtain the Client's or Trustees' direction to vote the proxies.

V. Oversight

Oversight of M&P's proxy voting practices is performed by the Investment Committee, which is comprised of the firm's investment managers and equity analysts. The firm's Chief Compliance Officer is a non-voting member of the Committee. Oversight of M&P's proxy voting policy with respect to the Funds is performed by the Trust's Board of Trustees.

VI. Disclosure to Clients

With respect to proxies voted on behalf of separately managed account clients, information concerning how we voted proxies is available upon request.

With respect to proxies voted on behalf of the Funds, the Trust is required to file with the SEC its complete proxy voting record for the 12-month period ending June 30, by no later than August 31 of each year. M&P will make its proxy voting record for the Funds available to Fund shareholders on its website for each twelve month period ending June 30. The proxy voting information will be made available on the Mairs & Power website as soon as is reasonably practicable after filing form N-PX with the SEC.

VII. Record Retention Requirements

M&P will maintain a record of documents in connection with this policy as required in its Record Retention Policy
