Bond Index ¹³	9.71	3.23	3.96	5.14	-

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. For most recent month-end performance figures, please call Shareholder Services at 800-304-7404.

⁹Performance shown includes the reinvestment of dividend and capital gain distributions, but does not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

¹⁰Composite Index reflects an unmanaged portfolio of 60% of the S&P 500 TR Index and 40% of the Bloomberg Barclays U.S. Government/Credit Bond Index. ¹¹Morningstar US Fund Allocation-50% to 70% Equity Category portfolios seek both capital appreciation and income by typically investing 50% to 70% of assets in equities and the remainder in fixed income and cash. ¹²S&P 500 TR Index is an unmanaged index of 500 common stocks that is generally considered representative of the U.S. stock market. ¹³Bloomberg Barclays U.S. Government/Credit Bond Index is a broad-based flagship benchmark that measures the non-securitized component of the U.S. Aggregate Index. It includes investment-grade, U.S. dollar-denominated, fixed-rate treasuries, government-related and corporate securities. One cannot invest in an index.

Balanced Fund Objective

Seeks to provide shareholders with capital growth, current income and preservation of capital.

The Fund's investment objective, risks, charges and expenses must be considered carefully before investing. The summary prospectus or prospectus contains this and other important information about the Fund and they may be obtained by calling Shareholder Services at 800-304-7404 or visiting www.mairsandpower.com. Read the summary prospectus or prospectus carefully before investing.

Holdings are subject to change without notice and may or may not represent current or future portfolio composition. The mention of specific securities is not intended as a recommendation or an offer of a particular security, nor is it intended to be a solicitation for the purchase or sale of any security.

Risks: All investments have risks. The Fund is designed for long-term investors. Equity investments are subject to market fluctuations and the Fund's share price can fall because of weakness in the broad market, a particular industry or specific holdings. Investments in small and mid-cap companies generally are more volatile. International investing risks include among others political, social or economic instability, difficulty in predicting international trade patterns, taxation, and foreign trading practices and greater fluctuations in price than U.S. corporations. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investments in lower-rated and non-rated securities present a greater risk of loss to principal and interest than higher-rated securities.

¹Turnover ratio: The turnover ratio or turnover rate is the percentage of a mutual fund or other portfolio's holdings that have been replaced in a given year.

²Active Share: A measure of the percentage of stock holdings in a manager's portfolio that differs from the benchmark index. Researchers conclude managers with high Active Share outperform their benchmark indexes and Active Share significantly predicts fund performance.

³Sharpe ratio: A measure that indicates the average return minus the risk-free return divided by the standard deviation of return on an investment.

⁴Net Asset Value (NAV) Per Share.

⁵Weighted average market capitalization is determined by multiplying the current market price by the number of outstanding shares and then taking an average to determine weighting.

⁶30-Day SEC Yield reflects the dividends and interest earned during the period after the deduction of the Fund's expenses. It may help investors estimate income, expressed as a percentage.

⁷Duration is a measure of the sensitivity of the price of a bond or other debt instrument to a change in interest rates.

⁸Although the Fund is no-load, investment management fees and other expenses still apply.

¹⁴Capitalization categories as defined by Mairs & Power: Large Cap >\$10B; Mid Cap \$2B to \$10B; Small Cap <\$2B.

****About Morningstar:** The Morningstar Rating for funds, or star rating, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed end funds, and separate accounts) with at least three-year history. Exchange-traded funds and open ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five- and 10-year (if applicable) Morningstar Rating metrics. The weights are 100% three-year rating for 36-59 months of total returns, 60% five-year rating, 40% three-year rating for 60-119 months of total returns and 50% 10-year rating, 30% five-year rating, 20% three-year rating for 120 or more months of total returns. While the 10-year overall rating formula seems to give the most weight for the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Morningstar Rankings represent a fund's total-return rank relative to all funds that have the same Morningstar Category. The highest percentile rank is 1 and the lowest is 100. It is based on Morningstar total return, which includes both income and capital gains or losses and is not adjusted for sales charges or redemption fees.
