Mairs & Power Small Cap has deftly navigated a difficult personnel situation, positioning this small-blend strategy for long-term success.

Strategy founder Andy Adams has successfully reduced his role here. Adams, who is now Mairs & Power's CIO, has led the firm's flagship Mairs & Power Growth MPMGX since 2019. That year, he handed this strategy's reins to comanager Al Steinkopf, but Steinkopf's unexpected illness and eventual passing in 2022 required a new plan. Adams briefly resumed the helm to aid comanager Chris Strom's development and to acclimate veteran Twin Cities investor Mike Marzolf to the firm and this team. Marzolf, hired in December 2021, progressed faster than Adams anticipated, and in June 2023 Marzolf took the lead here as Adams stepped back into a comanager role alongside Strom. The three-person team intends to be in place for at least the next few years.

Not much changed in the process during this period. Small-cap companies usually don't have much analyst coverage, so to gain an information advantage, this Mairs & Power team embraces its St. Paul-based firm's preference for Upper Midwest companies. Throughout its history, this strategy has invested about 75% or more of its assets in the region. Even so, its portfolio is regularly diversified by sector and industry. The managers also continue to seek profitable, competitively advantaged firms among the thousands of options in the small-cap universe.

The strategy has set—and cleared—a high bar for its performance. It benchmarks to the S&P SmallCap 600 Index. Unlike the more-familiar Russell 2000 Index, it focuses on profitable companies. Over the long term, it has proven to be better to invest in money-making businesses—especially among small caps—and this strategy has capitalized on that. The mutual fund's 11.8% annualized return from its August 2011 inception through January 2024 narrowly beat the S&P SmallCap 600 Index's 11.7% but bested the Russell 2000 Index and typical small-blend Morningstar Category peer by wider margins.

With Marzolf as the new lead and Adams still involved, this remains a worthy small-cap offering.

Process ● Above Average | Tony Thomas | 29 Feb 2024

A prudently tailored approach that leverages local contacts earns an Above Average Process rating.

The guiding principle of all Mairs & Power strategies is to buy and hold financially sound businesses with durable competitive advantages and above-average returns on equity. The managers here sensibly adjust this for small-cap companies, which might need to reinvest profits or borrow in order to grow market share or enhance their competitive position. To capture this kind of business spending, the managers rely on the more-

comprehensive return on invested capital as a key metric.

Yet there's an unusual twist. The managers prefer companies based near their firm's St. Paul, Minnesota, office or in the Upper Midwest more broadly. Looking locally can help them gain valuable perspective on firms that often aren't covered by Wall Street analysts, but it also limits the opportunity set.

The managers take meaningful steps, however, to compensate for that narrow focus and reduce risk. Their portfolio is reasonably diversified by sector. They help mitigate liquidity concerns by keeping individual positions under 4% of assets each and owning less than 10% of any given company. They also closed the strategy to new investors from 2016 to 2018 to keep total assets at conservative, deployable levels. A 14-member investment committee (which includes these managers) ensures consistency by vetting prospects and evaluating firms according to Mairs & Power's long-standing principles.

This strategy is rare in that it benchmarks to the S&P SmallCap 600 Index. Unlike the Russell 2000 Index category benchmark, it targets profitable companies. That said, this strategy generally holds its own on measures of profitability. The December 2023 portfolio's average returns on assets, equity, and invested capital were mostly in line with the S&P index but well ahead of the Russell 2000 Index. That's despite sharing only 10 of its 42 stock holdings with the S&P index. This lack of overlap gave the strategy a healthy 97% active share (a measure of a portfolio's difference from its benchmark and an indication of its opportunity for distinctive performance) in December. The portfolio's sector makeup also stands out: It typically has large stakes in industrials and financials—and, more recently, technology—compared with the S&P index, though it tends to have less in consumer cyclicals, real estate, and energy.

The emphasis on Upper Midwest companies is more pronounced here than in any other Mairs & Power mutual fund. Firms based in Minnesota, Wisconsin, Illinois, Iowa, or the Dakotas held 74% of assets in December 2023 and were seven of the portfolio's top 10 holdings.

While the portfolio has a consistent small-cap orientation overall, the managers are willing to hold—and occasionally buy—mid-cap stocks such as semiconductor firm Entegris ENTG. The \$20 billion market-cap company, first bought in early 2022, was a top-20 holding here in late 2023.

People ● Above Average | Tony Thomas | 29 Feb 2024

This team retains its Above Average People rating after coming through a difficult period about as well as possible.

Strategy architect Andy Adams, who is now in charge of Mairs & Power Growth MPGFX, had wanted to reduce his role here for a while, but it wasn't until mid-2023 that he likely reached that goal. He initially handed lead manager duties to Al Steinkopf in 2019, but unexpected health issues ultimately forced Steinkopf to return control to Adams in 2021. Meanwhile, Mairs & Power amassed other resources for the team, promoting small-cap analyst Chris Strom to comanager here in January 2021 and hiring veteran Twin Cities investor Mike Marzolf in December 2021. Steinkopf passed away a year later. Adams planned on leading the strategy through 2023, but Marzolf's quick acclimation gave Adams the confidence to hand him the reins in June. Adams and Strom remain onboard as comanagers, and Adams intends to stay involved (albeit in his current reduced capacity) for the foreseeable future.

The firm's investment committee also provided a steadying influence throughout these changes. The 14-member group includes these three managers, other industry veterans, and newer hires intended to address future retirements and build out its capabilities. It also generates the "durable competitive advantage" analyses central to the process here.

Parent ● Above Average | Tony Thomas | 27 Feb 2023

Mairs & Power, founded in 1931, is traditional but pragmatic. It earns an Above Average Parent rating.

Succession planning is rightly a point of pride. Since 2017, chairman and CEO Mark Henneman, CIO Andy Adams, and a handful of portfolio managers have made orderly transitions into their current roles, and in mid-2022 Henneman gave four years' notice for his planned December 2026 retirement. A central investment committee helps ensure consistency of philosophy and execution throughout these changes.

While relatively staid in its structure and investment approach, Mairs & Power isn't stale. Though the investment team has traditionally focused on companies in the Upper Midwest (near the firm's St. Paul headquarters), Henneman and Adams have pressed the firm to look beyond its home region for investment opportunities and diversification. It has long kept its funds competitive on fees, but the firm has recently sought other ways to serve investors' interests, exploring tax-efficient exchange-traded funds with a Minnesota muni-bond ETF launch in 2021 and deploying tools to minimize capital gains distributions, a wise move for a firm with decades-old stakes in some companies. Its new venture capital arm can support local startups and keep an eye on prospects for its public funds. These efforts show that the 92-year-old firm is willing to adapt to changing times and client demands.

Performance | Tony Thomas | 29 Feb 2024

This fund measures itself against a rarely used benchmark, the S&P SmallCap 600 Index. That index's profitability screens could make it tougher to beat over the long term than the less-selective Russell 2000 Index. That said, the fund's record against both—and its small-blend category—is quite competitive. From its August 2011 inception through January 2024, it's 11.8% annualized return edged out the S&P SmallCap 600 Index's 11.7% and more handily beat the Russell 2000 Index's 10.1%. It was also one of the category's best-performing funds.

The fund had a relatively rough 2023, however. Its 11.0% gain was modest versus both indexes and

the typical peer, all of which advanced more than 16%. The main culprit was stock selection in three key areas: financial services, consumer cyclicals, and technology. A few of the fund's regional banks took hits amid the Silicon Valley Bank-related turmoil early in the year and didn't fully recover, including Cullen/Frost Bankers CFR and First Interstate BancSystem FIBK (the managers have sold the latter). The managers also exited the laggard Sleep Number SNBR. The fund's worst performer in 2023 was Clearfield CLFD. The firm, which works on fiber connectivity, entered the portfolio in 2022's fourth quarter before the stock dropped nearly 70% in 2023. The managers are largely sticking with Clearfield—even adding to it as it sold off—on expected benefits from federal spending on rural broadband access.

Price | Tony Thomas | 29 Feb 2024

It's critical to evaluate expenses, as they come directly out of returns. Based on our assessment of the fund's People, Process, and Parent Pillars in the context of these expenses, we think this share class will be able to deliver positive alpha relative to the category benchmark index, explaining its Morningstar Medalist Rating of Silver.

Disclosures

The Morningstar Medalist Report is supplemental sales literature, and therefore must be preceded or accompanied by the investment's current prospectus or an equivalent statement. Please read this information carefully. In all cases, this disclosure statement should accompany this report. Morningstar is not itself a FINRA-member firm. All data presented is based on the most recent information available to Morningstar as of the release date and may or may not be an accurate reflection of current data for securities included in the fund's portfolio. There is no assurance that the data will remain the same.

Most Morningstar rankings do not include any adjustment for one-time sales charges, or loads. Morningstar does publish load-adjusted returns and ranks such returns within a Morningstar Category in certain reports. The total returns for share classes without one-time loads are equal to Morningstar's calculation of load-adjusted returns. Share classes that are subject to one-time loads relating to advice or sales commissions have their returns adjusted as part of the load-adjusted return calculation to reflect those loads.

Analyst-Driven and Quantitatively-Driven Content

The Managed Investment Report ("Report") may contain a Morningstar Medalist RatingTM or Pillar Scores that were derived quantitatively and/or quantitatively-driven written analysis (collectively, "Quantitatively-Driven Content") generated by a series of statistical models intended to replicate Morningstar's analyst output ("Analyst-Driven Content"). Quantitatively-driven analysis is written by taking the underlying statistics and supporting data for an investment product and translating those values into sentences and paragraphs. The framework in which quantitatively-driven analysis is generated uses mental models meant to mirror analyst-driven written analysis. Given the nature of the Quantitatively Driven Content, there is no one analyst in which a given Report is fully attributable to; however, Mr. Lee Davidson, Chief Analytics Officer for Morningstar, Inc., is responsible for overseeing the methodology that supports the Quantitatively Driven Content. Mr. Davidson is guided by the Morningstar, Inc. Code of Ethics in carrying out his responsibilities. Morningstar's Research, Investment, and Analytics Group includes research employees of various Morningstar, Inc. subsidiaries who prepare analysis on investment products and quantitative research employees of Morningstar, Inc. or its subsidiaries who aim to help investors by providing innovative research, models, and software. In the United States, research employees are employed by Morningstar Research Services LLC, which is registered with the U.S. Securities and Exchange Commission.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security's investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. For investments in foreign markets there are further risks, generally based on exchange rate changes or changes in political and social conditions.

Ratings and Pillar Scores are not statements of fact. Morningstar does not guarantee the completeness or accuracy of the assumptions or models used in determining the content in this report. A change in the fundamental factors underlying the report's content can mean that the information shown herein is subsequently no longer accurate.

Conflict Disclosure

This report is for informational purposes, should not be the sole piece of information used in making an investment decision, and has no regard to the specific investment objectives, financial situation or particular needs of any specific recipient. This publication is intended to provide information to assist investors in making their own investment decisions, not to provide investment advice to any specific investor. Therefore, investments discussed herein may not be suitable for all investors; investors must exercise their own independent judgment as to the suitability of such investments and recommendations in the light of their own investment objectives, experience, taxation status and financial position. Morningstar encourages report recipients to read all relevant issue documents (e.g., prospectus) pertaining to the security concerned, including without limitation, information relevant to its investment objectives, risks, and costs before making an investment decision and when deemed necessary, to seek the advice of a financial, legal, tax, and/or accounting professional.

"Morningstar" is used throughout this section to refer to Morningstar, Inc. and/or its affiliates, as applicable. Unless stated otherwise, the original distributor of the report is Morningstar Inc., a U.S.A. domiciled financial institution. Unless otherwise provided in a separate agreement, Morningstar makes no representation that the report contents meet all of the presentation and/or disclosure standards applicable in the jurisdiction where the recipient is located.

The report and its contents are not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality,

state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Morningstar or its affiliates to any registration or licensing requirements in such jurisdiction.

This report may be distributed in certain localities, countries and/or jurisdictions ("Territories") by independent third parties or independent intermediaries ("Distributors"). Such Distributors are not acting as agents or representatives of the analyst or Morningstar. In Territories where a Distributor distributes our report, the Distributor, and not the analyst or Morningstar, is solely responsible for complying with all applicable regulations, laws, rules, circulars, codes and guidelines established by local and/or regional regulatory bodies, including laws in connection with the distribution third-party research reports.

The opinions expressed within the report are given in good faith, are as of the date of the report and are subject to change without notice. Neither the analyst nor Morningstar commits themselves in advance to whether and in which intervals updates to the report are expected to be made. The written analysis, ratings and pillar scores within this report are statements of opinions; they are not statements of fact.

Morningstar believes reasonable efforts were made by its analysts to carefully research information contained in their analysis and by the Quantitative Research team in creating methodologies and choosing supporting data. The information on which the analysis is based has been obtained from sources which are believed to be reliable such as, for example, the fund's prospectus and shareholder reports (or their equivalents), managed investment company website, interviews with managed investment company personnel, and relevant and appropriate press sources as well as data, statistics and information within Morningstar's own database. While Morningstar, its analysts, and the Quantitative Research team has obtained data, statistics and information from sources it believes to be reliable, the data, statistics, and information has not been audited or independently verified.

For a list of managed investments which Morningstar currently covers and provides written analysis on or for information on a historical Morningstar Medalist RatingTM please contact your local Morningstar office. In certain jurisdictions, the report contents, except for the Morningstar Medalist Rating and key analysis/opinions, may be shared with the managed investment company prior to publication. In the unlikely event that Morningstar would change their analysis/opinions and/or the Morningstar Medalist Rating based on feedback as result of such review, the report would disclose such a fact.

Conflicts of Interest

Analysts may own (actual or beneficial) interests in the managed investments that are the subject of the Report. No material interests are held by the analyst or their immediate family in the managed investments that are the subject of the Report. Analysts have not received or purchased shares in the managed investments that are the subject of the Report prior to a public offering of such shares.

In general, Morningstar will not hold a material interest in the managed investments that are the subject of the Report. If a material interest is held by Morningstar, or if Morningstar owns a net long or short position in the managed investment that is the subject of this Report that exceeds 0.5% of the total issued share capital of the security, it will be disclosed at <https://www.morningstar.com/company/disclosures/holdings>

Morningstar employees' compensation is derived from Morningstar's overall earnings and consists of salary, bonus and in some cases restricted stock.

Neither Morningstar nor its analysts receive compensation or material benefits from product issuers or third parties in connection with the Report.

Morningstar's overall earnings are generated in part by the activities of the Investment Management and Research groups, and other affiliates, who provide services to product issuers.

Morningstar does not receive commissions for providing research and does not charge managed investment issuers to be rated.

Morningstar employees may not pursue business and employment opportunities outside Morningstar within the investment industry (including but not limited to, working as a financial planner, an investment professional or investment professional representative, a broker-dealer or broker-dealer agent, a financial writer, reporter, or analyst) without the approval of Morningstar's Legal and if applicable, Compliance teams.

Morningstar may provide the investment product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

Certain managed investments use an index created by and licensed from Morningstar, Inc. as their tracking index. We mitigate any actual or potential conflicts of interests resulting from that by not producing qualitative analysis on any such managed investment as well as imposing informational barriers (both technology and non-technology) where appropriate and monitoring by the compliance department.

Morningstar's Investment Management group has

arrangements with financial institutions to provide portfolio management/investment advice, some of which an analyst may issue investment research reports on. In addition, the Investment Management group creates and maintains model portfolios whose underlying holdings can include financial products, including managed investments that may be the subject of this Report. However, analysts do not have authority over Morningstar's Investment Management group's business arrangements nor allow employees from the Investment Management group to participate or influence the analysis or opinion prepared by them.

Morningstar, Inc. is a publicly traded company (Ticker Symbol: MORN) and thus a managed investment which is the subject of this Report may own more than 5% of Morningstar, Inc.'s total outstanding shares. Please access Morningstar, Inc.'s most recent Proxy Statement and refer to the section titled "Security Ownership of Certain Beneficial Owners and Management" at <https://shareholders.morningstar.com/investor-relations/financials/sec-filings/default.aspx>. A managed investment's holding of Morningstar stock has no bearing on and is not a requirement for managed investments Morningstar determines to cover.

Analysts do not have any other material conflicts of interest at the time of publication. Users wishing to obtain further information should contact their local Morningstar office.

Data Definitions

Data Coverage %

The Data Coverage % data point is a summary metric describing the level of data completeness used to generate the overall rating. If the pillar is assigned directly or indirectly by analysts, the pillar has complete data availability, as no model was used to estimate the pillar score. If the pillar is assigned directly by algorithm, Morningstar counts the number of data points feeding both the positive and negative models and counts whether the vehicle has strategy-specific data available. A simple percentage is calculated per pillar. The overall data coverage % is then scaled by pillar weights.

Analyst-Driven %

The Analyst-Driven % data point displays the weighted percentage of a vehicle's pillar ratings assigned directly or indirectly by analysts. For example, if the People and Parent ratings are assigned directly or indirectly by analysts but the Process rating is assigned algorithmically, the Analyst-Driven % for an actively managed vehicle would disclose that 55% of the pillar weight was assigned by analysts and the Analyst-Driven % for a passively managed vehicle would disclose that 20% of the pillar weight was assigned by analysts.

Morningstar Medalist Rating™

The Morningstar Medalist Rating is the summary expression of Morningstar's forward-looking analysis of

investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about the Medalist Ratings, including their methodology, please go to <http://global.morningstar.com/managerdisclosures>

The Morningstar Medalist Ratings are not statements of fact, nor are they credit or risk ratings. The Morningstar Medalist Rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks and uncertainties which may cause expectations not to occur or to differ significantly from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions or models when determined algorithmically, (iv) involve the risk that the return target will not be met due to such things as unforeseen changes in changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rates, exchange rate changes, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product. A change in the fundamental factors underlying the Morningstar Medalist Rating can mean that the rating is subsequently no longer accurate.

Morningstar Pillar Ratings

Morningstar Pillar Ratings are subjective evaluations of managed investments performed by manager research analysts of Morningstar. Morningstar evaluates managed investments based on five key pillars, which are people, process, parent, performance and price. Morningstar's analysts assign the people, process and parent pillars a rating of Low, Below Average, Average, Above Average, or High. Price and performance then used to help determine the managed investment's Morningstar Medalist Rating.

Morningstar Rating™

The Morningstar Rating™ for funds, or "star rating", is

calculated for funds and separate accounts with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. For more information about the Morningstar Rating for funds, including its methodology, please go to global.morningstar.com/managerdisclosures.

Investment Risks

Bonds

Bonds are subject to interest rate risk. As the prevailing level of bond interest rates rise, the value of bonds already held in a portfolio declines. Portfolios that hold bonds are subject to declines and increases in value due to general changes in interest rates. Portfolios that invest in lower-rated debt securities (i.e., "junk bonds") involve additional risks because of the lower credit quality of the securities in the portfolio. The investor should be aware of the possible higher level of volatility, and increased risk of default. Tax-free municipal bond funds may be subject to state and local taxation and the Alternative Minimum Tax.

Equities

Equities are typically subject to greater fluctuations in market value than other asset classes due to factors such as a company's business performance, investor perceptions, stock market trends and general economic conditions. Stocks of small or mid-sized companies involve additional risks; such companies may have a higher risk of failure, are not as well established as larger blue-chip companies, and have historically experienced a greater degree of market volatility than the overall market average.

International/Emerging Markets Securities Risk

Investing in international securities involves special additional risks. These risks include, but are not limited to, currency risk, political risk, and risk associated with varying accounting standards. Investing in emerging markets may accentuate these risks.

Liquidity Risk

Trading may be halted due to market conditions, impacting an investor's ability to sell a security.

Market Price Risk

The market price of securities traded on the secondary

market is subject to the forces of supply and demand and thus independent of the NAV. This can result in the market price trading at a premium or discount to the NAV, which will affect an investor's value.

Market Risk

The market prices of securities can fluctuate as a result of several factors, such as security-specific factors or general investor sentiment. Therefore, investors should be aware of the prospect of market fluctuations and the impact it may have on the market price.

Non-Diversified Strategies

Portfolios that invest a significant percentage of assets in a single issuer involve additional risks, including share price fluctuations, because of the increased concentration of investments.

Sector Strategies

Portfolios that invest exclusively in one sector or industry involve additional risks. The lack of industry diversification subjects the investor to increased industry-specific risks.

Morningstar 2024 Analyst Report: Mairs & Power Small Cap Fund (MSCFX)

The Funds' investment objectives, risks, charges, and expenses must be considered carefully before investing. The prospectus and summary prospectuses contain this and other important information about the Funds and may be obtained by calling Shareholder Services at (800) 304-7404 or by visiting www.mairsandpower.com. Read the prospectus and summary prospectuses carefully before investing.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Funds may be lower or higher than the performance quoted. As of the prospectus dated April 20, 2024, Mairs & Power Growth Fund, Mairs & Power Balanced Fund, and Mairs & Power Small Cap Fund have annual expense ratios of 0.64%, 0.71%, and 0.94%, respectively. For the most recent month-end performance figures, visit the Funds' website at www.mairsandpower.com or call Shareholder Services at (800) 304-7404.

Average Annual Total Returns for Periods Ending June 30, 2024

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>	<u>20 Years</u>	<u>Since Inception</u>
Mairs & Power Growth Fund ⁽¹⁾	22.87	8.46	13.94	11.18	9.94	11.49
Mairs & Power Balanced Fund ⁽¹⁾	11.43	2.72	7.33	6.78	7.44	9.37
Mairs & Power Small Cap Fund ⁽¹⁾	6.62	1.09	6.93	7.14	N/A	11.93
S&P 500 Total Return (TR) Index ⁽²⁾	24.56	10.01	15.05	12.86	10.29	N/A
Composite Index ⁽³⁾	15.48	4.81	9.08	8.45	7.69	N/A
S&P 600 Small Cap Total Return (TR) Index ⁽⁴⁾	8.66	-0.26	8.06	8.24	N/A	N/A

⁽¹⁾ Performance information shown includes the reinvestment of dividend and capital gain distributions, but does not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

⁽²⁾ The S&P 500 TR Index is an unmanaged index of 500 common stocks that is generally considered representative of the U.S. stock market. It tracks both the capital gains of a group of stocks over time and assumes that any cash distributions, such as dividends, are reinvested back into the index. It is not possible to invest directly in an index.

⁽³⁾ The Composite Index reflects an unmanaged portfolio of 60% of the S&P 500 TR Index and 40% of the Bloomberg U.S. Government/Credit Bond Index. It is not possible to invest in an index.

⁽⁴⁾ The S&P SmallCap 600 Total Return Index is an index of small-company stocks managed by Standard & Poor's that covers a broad range of small cap stocks in the U.S. The index is weighted according to market capitalization and covers about 3-4% of the total market for equities in the United States. It tracks both the capital gains of the group of stocks over time and assumes that any cash distributions, such as dividends, are reinvested back into the index. It is not possible to invest directly in an index.

The statements and opinions are those of the author as of the date of this report. All information is historical and not indicative of future results and subject to change. The reader should not assume that an investment in the securities mentioned was or would be profitable in the future. This information is not a recommendation to buy or sell. Past performance is not indicative of future results. Diversification does not eliminate the risk of experiencing investment losses.

All investments have risks. The Funds are designed for long-term investors. Equity investments are subject to market fluctuations and the Fund's share price can fall because of weakness in the broad market, a particular industry or specific holdings. Investments in small and midcap companies generally are more volatile. International investing risks include among others political, social or economic instability, difficulty in predicting international trade patterns, taxation and foreign trading practices and greater fluctuations in price than U.S. corporations. The Balanced Fund is subject to yield and share price variances with changes in interest rates and market conditions. Investors should note that if interest rates rise significantly from current levels, bond total returns will decline and may even turn negative in the short-term. There is also a chance that some of the Balanced Fund's holdings may have their credit rating downgraded or may default. The Small Cap Fund may invest in initial public offerings by small cap companies, which can involve greater risks than investments in companies that are already publicly traded.

For the 3-, 5-, and 10-year periods, the Small Cap Fund has a rating of 3 stars overall, 3 stars, 3 stars, and 3 stars out of 574, 574, 544, and 388 small blend funds, respectively, as of 06/30/2024.

The Morningstar Rating™ for funds, or “star rating”, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Small Cap Fund was rated against the following numbers of small blend funds over the following time periods: 585 funds in the last three years, 553 funds in the last five years, and 384 funds in the last 10 years. Past performance is no guarantee of future results.

The Morningstar Medalist Rating™ is the summary expression of Morningstar’s forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar’s conviction in those products’ investment merits and determines the Medalist Rating they’re assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst’s qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about these ratings, including their methodology, please go to global.morningstar.com/managerdisclosures/.

The Morningstar Medalist Ratings are not statements of fact, nor are they credit or risk ratings. The Morningstar Medalist Rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks and uncertainties which may cause expectations not to occur or to differ significantly from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions or models when determined algorithmically, (iv) involve the risk that the return target will not be met due to such things as unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rates, exchange rate changes, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product. A change in the fundamental factors underlying the Morningstar Medalist Rating can mean that the rating is subsequently no longer accurate.

The stocks mentioned herein represent the following percentages of the total net assets of the Mairs & Power Small Cap Fund as of June 30, 2024: Clearfield 3.41%, Cullen/Frost Bankers 2.78%, Entegris 3.24%, First Interstate BancSystem 0.00%, Silicon Valley Bank 0.00%, Sleep Number 0.00%. All holdings in the portfolio are subject to change without notice and may or may not represent current or future portfolio composition. The mention of specific securities is not intended as a recommendation or offer for a particular security, nor is it intended to be a solicitation for the purchase or sale of any security.

The Russell 2000 Index is an index measuring the performance of approximately 2,000 small-cap companies in the Russell 3000 Index, which is made up of 3,000 of the biggest U.S. stocks. It is not possible to invest directly in an index.

Sharpe ratio is a measure that indicates the average return minus the risk-free return divided by the standard deviation of return on an investment.

Sortino ratio measures the risk adjusted return of an investment asset, portfolio or strategy by calculating the excess return over the risk-free rate divided by the downside semi-variance.

Alpha is the measure of an active return on an investment, the performance of that investment compared with a suitable market index.
